Stormwater Utility Fee Credit Application Form

Stormwater Utility customers may receive a credit for constructing, operating and maintaining a stormwater facility that reduces the pollutant discharge, reduces flood impact, or both from the property. Customers seeking a credit must submit all required information and must be received by Public Works no later than August 1st to be eligible for credit on the property tax mail-out in November.

Following initial approval, every five (5) years the customer must submit a signed and sealed statement by a Florida registered professional engineer that certifies the system is operating as designed and has been properly maintained.

Please complete this form and attach the required supporting documentation. If you have any questions or need assistance in completing the application, contact a Stormwater Utility representative at 386-943-7027. Complete applications should be mailed to:

County of Volusia
Department of Public Works

- A valid Chapter 40-42, F.A.C. St. Johns River Water Management District Permit for water quality with certification by a Florida registered professional engineer that the facility is operating as designed and is regularly maintained* (34% credit).
- A valid Chapter 40C-40 or 40C-4 F.A.C. St. Johns River Water Management District Permit for quality and quantity with certification by a Florida registered professional engineer that the facility is operating as designed and is regularly maintained* (68% credit).
- Demonstration that the site does not discharge stormwater offsite to the stormwater management system during the 100-year, 24-hour design storm event as defined by the St. Johns River Water Management District. Certification with applicable plans and calculations signed and sealed by a Florida registered professional engineer is required (68% credit).
- Provide proof that both pollutant discharge affecting water quality and stormwater flow affecting water quantity are reduced to standards set forth by the St. Johns River Water Management Permit. Certification with applicable plans and calculations signed and sealed by a Florida registered professional engineer is required (68% credit).
- Provide proof that pollutant discharge affecting water quality is reduced to standards set forth by the St. Johns River Water Management Permit. Certification with applicable plans and calculations signed and sealed by a Florida registered professional engineer is required (34% credit).

* For new developments, an as-built certification by a Florida registered professional engineer will be acceptable up to one year after the certification.

Important Information

For multi-phased developments, the application must clearly describe the phase or phases that are to be considered for this credit.

For phases with separate permits or operation and maintenance entities, a separate application must be submitted for each.

For multi-unit developments, such as a condominium association or homeowners association, the association representative or designated agent shall be responsible for application submittal.
