Annual Flushing and Treating of Village of Pine Run Water Association Water Distribution System(s)

The Village of Pine Run will perform an annual flushing of the water distribution system beginning **February 21, 2024**. The treatment and flushing will be completed no later than **March 13, 2024**, at which time we will return to chloramines.

This will involve changing the disinfectant from the chloramines presently in use, to free chlorine. Over a period of 3 weeks, free chlorine residual will be allowed to move out into the distribution system while a thorough flushing of all water mains is conducted. This is done annually to maintain the quality of the water, and to ensure that the water distribution system is bacteriologically safe. During this time, the water continues to be of the highest quality and totally safe to drink. However, with the change in disinfectant, some customers may notice a slight difference in the taste of the water.

If you have any questions concerning this procedure, please feel free to contact:
Water Treatment Plant Personnel at (386)860-3148
Village of Pine Run Property Manager at (386)673-7907
Volusia County Water Resources & Utilities at (386) 822-6465
Volusia County Health Department can also be contacted at (386) 624-0483

Thank You,
Volusia County Water Resources & Utilities
