before October 2, 2009 to assure your seat in class.

This workshop will:

- ✓ Provide training to governmental, environmental and other landscape personnel on lawn and landscape management practices in the new Best Management Practices for lawn and landscape to conserve and protect Florida's water resources.
- ✓ Instructors will explain the impact these practices will have on businesses and cities.
- ✓ Participants attending and passing a post-test will receive a Certificate of Completion for Green Industry BMPs.
- ✓ This certification will put landscape professionals into compliance with SB 494, the new law which requires all commercial fertilizer applicators to have a FDACS license by January 1, 2014. Passing the GI-BMP training, or an approved equivalent, is mandatory to obtain that license.
- ✓ Developed by the pest control industry and endorsed by the Florida Department of Environmental Protection, this training is brought to you by UF-IFAS.
