FOR ORGANIC PRODUCTION

ACTIVE INGREDIENT:
Bacillus thuringiensis, subsp. israelensis, strain AM 65-52
fermentation solids and solubles .......................... 37.4%
OTHER INGREDIENTS .............................................. 62.6%
TOTAL ........................................................................ 100.0%

[Potency: 3000 International toxic units (ITU) per mg]
Equivalent to 1.36 billion ITU/lb.
The percent active ingredient does not indicate product performance
and potency measurements are not Federally standardized.

KEEP OUT OF REACH OF CHILDREN

CAUTION

1.0 FIRST AID

If inhaled
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance,
  then give artificial respiration, preferably by mouth
to mouth, if possible.
• Call a poison control center or doctor for further
treatment advice.

If in eyes
• Hold eye open and rinse slowly and gently
  with water for 15-20 minutes.
• Remove contact lenses, if present, after the
  first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for
treatment advice.

HOT LINE NUMBER
Have the product container label with you when calling a poison
control center or doctor, or going for treatment. You may also contact
1-877-315-9819 for emergency medical treatment and/or transport
emergency information. For all other information, call 1-800-323-9597.

2.0 PRECAUTIONARY STATEMENTS

2.1 HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if inhaled. Avoid breathing dust. Remove contami-
nated clothing and wash before reuse. Causes moderate
eye irritation. Avoid contact with eyes or clothing. Wash
thoroughly with soap and water after handling.

2.2 Personal Protective Equipment

Applicators and other handlers must wear:
• Long-sleeved shirt and long pants.
• Waterproof gloves.
• Shoes plus socks.

Mixer/loaders and applicators not in enclosed cabs or
aircraft must wear a dust/mist filtering respirator meeting
NIOSH standards of at least N-95, R-95 or P-95. Repeated
exposure to high concentrations of microbial proteins can
cause allergic sensitization.

Follow manufacturers instructions for cleaning/maintaining
PPE. If no such instructions for washables, use detergent
and hot water. Keep and wash PPE separately from other
laundry.

2.3 User Safety Recommendations

Users should:
• Wash hands before eating, drinking, chewing gum, using
tobacco products or using the toilet.

2.4 Environmental Hazards

Do not apply directly to treated finished drinking water
reservoirs or drinking water receptacles when water is
intended for human consumption.

3.0 DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a
manner inconsistent with its labeling.

For any requirements specific to your State or Tribe, con-
sult the agency responsible for pesticide regulation.

3.1 Chemigation

Do not apply this product through any type of irrigation
system.

4.0 STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or
disposal.

Storage: Store in a cool [59°-86°F (15°-30°C)], dry place.

Pesticide Disposal: Wastes resulting from the use of this
product may be disposed of on site or at an approved waste
disposal facility.

Container Disposal: Nonrefillable container. Do not reuse or
refill this container.

Triple rinse container (or equivalent) promptly after emptying.
Triple rinse as follows: Empty the remaining contents into
application equipment or a mix tank and drain for 10 seconds
after the flow begins to drip. Fill the container 1/4 full with water
and recap. Shake for 10 seconds. Pour rinsate into application
equipment or a mix tank or store rinsate for later use or dis-
posal. Drain for 10 seconds after the flow begins to drip.
Repeat this procedure two more times. Offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

5.0 APPLICATION DIRECTIONS

Do not apply when wind speed favors drift beyond the area of treatment.

Mosquito Habitat Suggested Rate Range* (Such as the following examples):

- Irrigation ditches, roadside: 1.75 - 7.0 oz/acre
- Ditches, flood water, standing pools: 50 - 200 g/acre
- Woodland pools, snow melt pools, pastures: 125 - 500 g/ha
- Catch basins, storm water retention areas, tidal water, salt marshes: 0.5 - 1.0 kg/ha
- Rice fields, artificial containers and natural containers.

In addition, standing water containing mosquito larvae, in fields growing crops such as: Alfalfa, almonds, asparagus, corn, cotton, dates, grapes, peaches and walnuts, may be treated at the recommended rates.

Mosquito Habitat Suggested Rate Range* (Such as the following examples):

- Polluted water: 7.0 - 14.0 oz/acre
- (such as sewage lagoons, animal waste lagoons): 200 - 400 g/acre
- (0.5 - 1.0 kg/ha)

* Use higher rate range in polluted water and when late 3rd and early 4th instar larvae predominate, mosquito populations are high, water is heavily polluted, and/or algae are abundant.

7.0 GROUND AND AERIAL APPLICATION

VectoBac WDG may be applied using conventional ground or aerial application equipment with quantities of water sufficient to provide uniform coverage of the target area. For application, first add the VectoBac WDG to water to produce a final spray mixture.

The amount of water will depend on weather, spray equipment, and mosquito habitat characteristics. For application, fill the mix tank or plane hopper with the desired quantity of water. Start the mechanical or manual agitation to provide moderate circulation of water before adding the VectoBac WDG. Backpack and compressed air sprayers may be agitated by shaking after adding VectoBac WDG to the water in the sprayer. VectoBac WDG suspends readily in water and will stay suspended over normal application periods. Brief recirculation may be necessary if the spray mixture has sat for several hours or longer. Do not mix more VectoBac WDG than can be used in a 48 hour period. AVOID CONTINUOUS AGITATION OF THE SPRAY MIXTURE DURING SPRAYING.

For ground spraying, apply 1.75-14 oz/acre (50-400 g/acre; 123-988 g/ha) of VectoBac WDG in 5-100 gallons of water per acre (47-950 liters/ha) using hand-pump, airblast, mist blower, or other spray equipment.

For aerial application, apply 1.75 -14 oz/acre (50-400 g/acre; 123-988 g/ha) of VectoBac WDG in 0.25-10 gallons of water per acre (2.4-93.5 liters/ha) through fixed wing or helicopter aircraft equipped with either conventional boom and nozzle system or rotary atomizers to provide uniform coverage of the target area.

7.1 Aerial Application

Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many equipment-and-weather-related factors determine the potential for spray drift. The applicator and the treatment coordinator are responsible for considering all of these factors when making decisions.

Rinse and flush spray equipment thoroughly following each use.
