

COUNTY OF VOLUSIA, FLORIDA

ANNUAL REPORT ON COUNTY DEBT
FOR THE FISCAL YEAR ENDED SEPTEMBER 30, 2011

County of Volusia, Florida

Annual Report on County Debt For the Fiscal Year Ended September 30, 2011

Prepared by:

Charlene S. Weaver, CPA
Deputy County Manager/Chief Financial Officer

Rhonda C. Orr, CGFO
Deputy Director, Financial and Administrative Services

ACKNOWLEDGEMENTS

The compilation of this document is attributed to the combined efforts of several individuals deserving of special recognition. The cooperation, contributions and expertise provided by each one are greatly appreciated.

The Accounting Division staff is commended for their expertise and efforts put forth in preparation of the Comprehensive Annual Financial Report. The CAFR is the foundation for information contained in this report.

Accounting Division

Donna de Peyster, CPA, Accounting Director
Mary Felton, CGFO, Assistant Accounting Director
Terri Bergeron, Administrative Coordinator II
Natalia Eckroth, Senior Accountant
Patricia Kehr, Senior Accountant
Shirley Liu, Accountant
Terri Ruegger, Accountant
Lynn Urice, Accountant
Myriam Lemay, Investment Manager

Our Financial Advisors serves as consultants and advisors in many areas of financial management. The depth of experience and breadth of knowledge has served the County well in refinancing of bonds issues and data analysis for proposed offerings of debt.

EXECUTIVE SUMMARY 2011

This document provides a detailed discussion of outstanding debt and debt service obligations for the county. The ensuing report details information relating to the extent, nature and purpose of the county's indebtedness. It is a comprehensive, yet consolidated analysis; one which provides information that can assist in the evaluation, review and planning of future financings, while taking into consideration the impact of such financings on the county's financial health. Data contained in the audited Comprehensive Annual Financial Report for fiscal year ended September 30, 2011 provides its foundation.

As of September 30, 2011, total county outstanding indebtedness was \$290,583,438 and included bonded debt of \$252,467,000, state revolving fund loans of \$14,745,438, and other loans totaling \$23,371,000. This represents a \$15.9 million reduction in outstanding county debt over last fiscal year. The County issued no new bonded debt for fiscal year 2011 and retired an additional \$8 million of outstanding debt.

FINANCIAL MANAGEMENT STRATEGIES

The county takes a planned approach to the management of debt, funding from internally generated capital where appropriate, and financing when appropriate. Conservative financial strategies and management practices help to minimize exposure to sudden economic shocks or unanticipated expenditures. Quarterly monitoring and evaluation of factors that can affect the financial condition of the county help identify any emerging financial concerns. The practice of multi-year forecasting enables management to take corrective action long before budgetary gaps develop into a crisis. These practices have served the county well during this difficult economic climate. The county has managed to maintain fiscal sustainability and a fiscally resilient government.

The Government Finance Officer's Association and other national associations have published best practices promoting efficiency in government and solvency in public finance. One best practice focuses on the appropriate level of unrestricted fund balance in the General Fund. Credit rating agencies monitor levels of fund balance and unrestricted fund balance to evaluate creditworthiness. In keeping with this best practice, in fiscal year 1999-2000, the County Council adopted a minimum goal of 5 percent working toward a goal of 10 percent of current revenues to fund this reserve in ad valorem tax funds. Funding of the reserve provides flexibility in responding to economic downturns or sudden changes in revenue. The importance of these reserves became very evident in 2004 when the county experienced the financial burden of four hurricanes. For the next budget year, approximately 9.5% has been reserved in the General Fund and 5% in the Municipal Service District Fund. Other emergency reserves include the Library at 8%; Ponce DeLeon Authority at 10%; Mosquito Control at 10%; and Fire Services at 10%.

For the last six years, measures have been taken to "tighten the belt" by eliminating positions through attrition and becoming more efficient in operations. Management's vigilant review of changes in the economy along with monitoring revenue and expenditure trends has allowed for operational changes that have helped stabilize operations and weather the economic downturn. The county reacted early and has maintained the course, keeping an eye

on the fiscal health of the organization making tough decisions when needed. The organization continues to provide citizens with the services they depend upon; however, few new or expanded programs or capital projects are budgeted.

Our organization is leaner than six years ago, due to the willingness of the employees, from top to bottom, to embrace change and respond positively to the current realities. A reduction in personal services reflects various changes ranging from retirements, reduced overtime, filling positions at a lower rates, and un-funding positions when possible. In addition, to ensure the county does not become reliant on unreserved and undesignated fund balance to fund on-going operating costs, one-time revenues are allocated for one-time capital purchases, to pay off debt or to increase operating reserves.

Management continues to use the Capital Improvement Plan to prioritize current and future infrastructure requirements to fit within the anticipated level of financial resources. The report develops a plan to fund those requirements over a five-year period and is reviewed and updated annually. It serves as a planning and management tool, rather than a wish list of projects that cannot be fully implemented.

NOTABLES

Debt Retirement

The final scheduled payment on the Subordinate Lien Sales Tax Improvement Refunding Revenue Bonds, Series 2001B occurred on 10/1/2010 and the bonds were retired.

On January 20, 2011, County Council approved the redemption of the remaining installment purchase agreement originally issued through the Florida Association of Counties for the purchase of computer equipment for the criminal justice information system. The remaining obligation of \$8,012,000 was paid on February 8, 2011 with one-time revenue, reducing interest expense and future operating costs by liquidating the debt.

Refinancing Commercial Paper Loans

Over the last several years, interest rates have continued to trend downward. Staff continually monitors the market and evaluates the financial feasibility of refinancing outstanding debt for interest savings. On November 18, 2010, County Council approved the refinancing of seven installment purchase agreements whose total remaining principal balance equaled \$17,750,000 and were originally issued by the Florida Association of Counties to acquire or construct various improvements. The loan issued through JP Morgan Chase, carried a favorable fixed rate of 3.02% and pledged non-ad valorem revenues. The new note refinanced the following obligations:

- Land acquisition on the south side of the Daytona Beach International Airport, \$1,361,000, term of 6 years
- Acquisition and construction of trails, \$4,724,000, term of 10 years
- Capri Drive and West Highland subdivision special assessment district improvements, \$1,790,000 combined total, term of 10 years;
- Ocean Center improvements, \$9,875,000, term of 20 years.

Notes Payable Issued Commuter Rail

The county has been evaluating the possibility of rail service linking Volusia County and the Orlando metropolitan area since 1997. On July 31, 2007, the county joined Orange, Osceola, and Seminole counties, and the City of Orlando to create the Central Florida Commuter Rail Commission. The purpose of this commission is to provide for the operation and creation of a funding plan for a light rail system that will serve the central Florida area. Each of these counties and city contributes one member to form the governing board of the commission. The commission entered into two agreements with the Florida Department of Transportation who will provide the funds for a 50 percent match of federal funds for the acquisition and construction of a commuter rail system. As a commission partner, the County is responsible for providing a portion of the capital costs and debt service payments. Volusia County has pledged \$26.5 million, which will pay for train stations in DeBary and DeLand, train sets and track improvements. On February 27, 2007, the County Council approved using State Infrastructure Bank (SIB) loans to cover the county's share of the local capital costs. The county received approval for two State Infrastructure Bank (SIB) loans totaling \$12.5 million for Phase I construction. Draws for Phase I construction began in February 2011 and totaled \$5.6 million by fiscal year end. Volusia County intends to apply for an additional \$12.4 million SIB loan in the summer of 2012 to complete Phase II construction. Commuter service is projected to begin in 2013.

ECONOMIC OUTLOOK

As Florida and the nation begin to recover from one of the worst recessions in history, there has been slight improvement in unemployment rates, consumer spending, and building activity. While the volume of foreclosures and low-valued housing inventory has kept area property values low, the reduction in the tax base has slowed. The county's property base fell 7.7% from \$26 billion in fiscal year 2011 to \$24 billion in fiscal year 2012; down from the 13.2% reduction in the previous year. There has been some growth in consumer spending. Sales tax revenue has begun to trend upward and is estimated at \$16.3 million for fiscal year 2013, an increase of 2.5%. The collection of utility, resort and communication taxes are expected to increase by a modest \$1.6 million over 2011 amounts. However, gas tax collections continue to lag. For fiscal year 2012, gas tax revenue is projected at \$14.5 million; slightly lower than fiscal year 2011 (\$14.8 million).

SUBSEQUENT EVENTS

On July 3, 2012, the county refinanced the outstanding Subordinate Lien Sales Tax Refunding Revenue Bond, Series 2003 in the amount of \$4,780,000. Bank of America Public Capital Group submitted the lowest proposed rate of 1.955%, in the form of a non-qualified bank loan secured by a subordinate lien on sales tax revenues. It is a fixed rate bond with a repayment period of just over nine years. The refinancing will generate savings of more than \$362,000 (net present value) over the term of the bonds. The refunding will also eliminate the requirement to maintain restricted debt service reserves of \$634,000.

Additionally, in August 2012, the county issued an RFP to refinance the outstanding Water and Sewer Refunding Revenue Bonds, Series 1998 and 2003, and the Airport System Refunding Revenue Bonds, Series 2003. SunTrust Equipment Finance & Leasing Corp (STEFL) proposed a rate of 1.61% for the Water and Sewer Refunding Bonds, generating

savings of \$426,112 (NPV) over the term of the bonds. STEFL proposed a rate of 1.75% for the Airport bonds, generating a savings of \$611,402 (net present value) over the life of the bonds. This refinancing is pending council approval in September 2012.

CLOSING COMMENTS

Management continues to monitor declining revenues and their potential impact on bond covenants and debt service requirements. Mini-budget workshops are convened at most county council meetings to allow the council to focus on specific areas of the budget and make decisions regarding potential service level modification. These sessions facilitate review of the department operating plans and offer input and guidance to the manager for preparation of next year's budget. Staff continues to monitor the legislative sessions to determine the financial impact on the county with any legislative changes.

The county's overall debt profile is characterized by good debt service coverage from its pledged revenues and is in conformance with all compliance covenants. The debt burden is low, and the county has significant debt capacity remaining. All proposed financings are analyzed for their impact on the county's financial picture.

Fiscal policy established by the County Council and implemented by county management, includes sound management practices, continued vigilance in long range monitoring of revenue and expenditure trends, maintaining strong reserve balances, prudent fiscal practices and a conservative approach to debt management. While the county continues to face great challenges, strong financial management, manageable debt levels, and financial flexibility, are all indicators of good fiscal health.

August 2012

TYPES OF DEBT ISSUED BY VOLUSIA COUNTY

Local government bonded debt is usually divided into three different types: general obligation bonds, non-self-supporting revenue bonds and self-supporting revenue bonds.

- **General obligation (“G.O.”) bonds** are backed by a pledge of the full faith and credit of the issuing entity. The full faith and credit is a pledge of the general taxing powers for the payment of the debt obligation. Because of the impact on property owners, the issuance of general obligation debt in Florida requires the consent of the voters through a referendum.
- **Non-self-supporting revenue bonds** - Bonded debt for which local government has pledged its general revenues. These revenues may include either ad valorem (property tax) and/or non-ad valorem (building and zoning permit fees, franchise fees, gas taxes, sales tax, etc.)
- **Self-supporting debt** – Bonded debt that the local government has pledged to repay with revenues generated from operations. Examples would include a water bond that is repaid from water utility income, and special assessment bonds that are repaid from fees levied on properties within a special assessment district.

Other Financing Instruments:

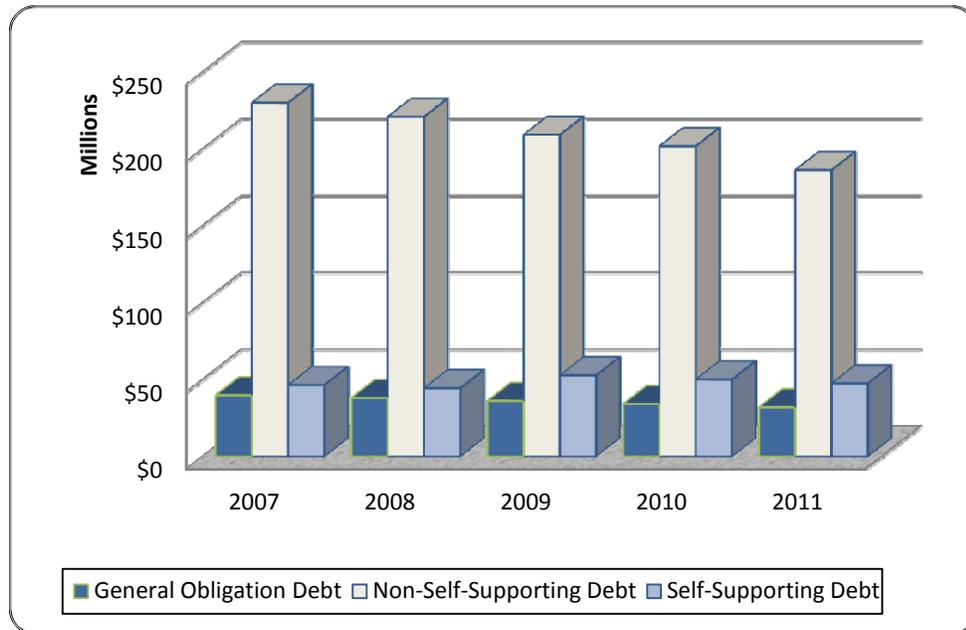

Short-term tax-exempt financing instruments are often used to partially fund the capital outlay and capital improvement programs. This type of financing offers low interest rates,

flexible repayment terms, and minimal issuance costs. Additionally, there are no underwriter fees, rating agency fees, printing costs or reserve funds. These loans are generally subject to annual appropriation.

- **Commercial Paper Loan Program** – The Florida Local Government Finance Commission (FLGFC) was established to provide short-term borrowing for a term of up to five years. The program provides short-term variable interest rates, to participating counties, cities, school boards and special districts in Florida. The program offers very low interest rates, low fees and the repayment terms are very flexible. With the current low interest rate environment, this program has offered interest rates that is unmatched by private sector lenders.
- **SRF Loans** – The State of Florida, pursuant to Section 403.1835, Florida Statutes, makes low cost loans to local governments for the construction of wastewater pollution control facilities. Loan repayments can be recycled into additional loans.
- **Fixed or Variable Rate Loans** – A fixed rate loan is one in which the interest rate does not fluctuate with general market conditions. A variable rate loan has the interest rate tied to a rate that is adjusted upward or downward each time the base rate changes. The County uses fixed rate loans when the borrowing is relatively small and it is advantageous to lock in a fixed rate for a longer term.

Total Outstanding			\$252,467,000				

* Due to bond insurer rating downgrades of MBIA, FGIC and AMBAC, Material Events Notices were filed

§ Due to surety provider (MBIA) downgrades below the AAA rating level, the County is required to replace the surety policy or fund the reserve with cash over a 5 year time period. Due to the unstable market conditions, the County elected to fund the reserve (\$2.5M) with cash using semi-annual installments. The first payment was to be made December, 2008.

¥11/08 The surety holder (MBIA) was downgraded below the A rating level, which required acceleration of the funding requirement from 5 years (see note §) to 1 year.

Despite the rating downgrades of the surety providers, the County is not obligated to replace the surety policy per the financing documents. The ratings requirements only applied at the time of acquiring the surety.

BOND RATINGS

GENERAL INFORMATION

Most bond issues are assigned a rating by a rating agency, such as *Fitch Ratings*, *Moody's Investors Service*, and/or *Standard & Poor's*. The rating is an extremely important factor in determining an issues' marketability and the interest rate a local government will pay. Ratings are relied upon by investors in making investment decisions and by underwriters in determining whether to underwrite a particular issue.

In order for a bond issue to be rated, the local government must contract with a rating agency and pay a fee. The local government provides the rating agency with operational and financial information. The agency rates the bond issue based on a detailed analysis of this information. The agencies review ratings on a regular basis to determine if the risk of default has changed over time. If they feel that the level of risk has changed, the agencies may downgrade or upgrade a rating. This review is often referred to as "surveillance".

An underlying rating is a rating that would be assigned without bond insurance. It is intended to reflect the creditworthiness of the credit instrument on its own merit.

AGENCY RATINGS

Fitch and Standard & Poor's rates bond issues from **AAA** to **D**. Bonds which are rated **AAA**, are considered to carry the highest credit quality and have an exceptionally strong ability to pay interest and repay principal. The ratings may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Moody's rates bond issues from **Aaa** to **C**. Bonds which are rated **Aaa** are judged to be of the highest quality and carry the smallest degree of risk. Moody's applies numerical modifiers 1, 2, and 3 in each rating classification. The Modifier 1 indicates that the issue ranks in the higher end of the rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates that the issue ranks in the lower end of the category.

The following are the assignment approaches of the major rating services for the high to medium grade securities.¹

Quality	Moody's	S&P	Fitch	Rating Definitions
Investment Grade				Provided by Moody's and S&P
Highest Quality	Aaa	AAA	AAA	Minimal Credit Risk - Extremely strong financial commitment
High Quality	Aa1 Aa2 Aa3	AA+ AA AA -	AA+ AA AA -	Very Low Credit Risk - Very strong financial commitment
Upper Medium Grade	A1 A2 A3	A+ A A -	A+ A A -	Low Credit Risk - Strong financial commitment
Medium Grade	Baa1 Baa2 Baa3	BBB+ BBB BBB -	BBB+ BBB BBB -	Moderate Credit Risk - May possess certain speculative characteristics

Water and Sewer Refunding Revenue Bonds, Series 1998

\$5,085,000

Purpose To provide funds sufficient to advance refund a portion of the County's outstanding Water and Sewer Revenue Refunding and Improvement Bonds, Series 1989. The 1989 Bond Issue was used to finance the cost of certain capital improvements to the County's water and sewer system.

Dated Date July 1, 1998

Issue Date July 23, 1998

Final Maturity October 1, 2016

Revenue Pledged Net Revenues from operation of the County's Water and Sewer System, connection fees, & investment earnings.

Payment Dates Annual payments due October 1; semiannual interest payable on April 1 and October 1

Call Schedule October 1, 2008 through September 30, 2009 @101%
October 1, 2009 & thereafter @100%

Insurance FGIC

Surety None

<i>Estimated Debt Capacity*:</i>				
General Fund	\$24 MM	\$40 MM		
MSD	\$30 MM		\$45 MM	\$82 MM
Projected Financing Term	25 YEARS	30 YEARS	30 YEARS	30 YEARS

**Calculated by PFM*

This table provides a *theoretical* presentation of bondable debt capacity for several of the County's major revenue sources. All of the revenues discussed here are currently expended as part of ongoing operations within the County. Each revenue source would have to be examined to determine if the expected growth would offset any revenue redirected from operating to pay debt service, or to identify a new source of funding for operations.

The State of Florida distributes the Local Government Half-Cent Sales Tax revenue to the County by allocation formula set by Florida Statutes. A portion of this revenue is pledged as security for the Sales Tax Improvement Revenue Bonds, Series 2003 and 2008.

¹ Sales Tax Revenue is split by a statutory formula distribution; 68.5% allocated for General Fund purposes, and 31.5% for the MSD. The General Fund share is currently used to pay debt service on countywide bond issues, which leaves an approximate split of 44/56 (GF/MSD) of the funds available for new debt service. Also, the Sales Tax debt service is constrained in the early years, therefore, the capacity is the same for a 25 or 30 year deal.

² Effective July 1, 2004, the Florida Legislature has limited the amount of revenue sharing funds received in the prior fiscal year that can be pledged to bond indebtedness to 50%.

DEBT CAPACITY (CONT'D)

In addition, the Capital Improvement Revenue Bond, Series 2009A and 2009B have a subordinate lien on the revenues. Proceeds generated from these bonds funded capital construction and improvement projects. In FY 2010-2011, the County received \$15.3 million in sales tax revenues. All remaining sales tax revenues were split between the General Fund and the Municipal Service District and were expended as part of the normal ongoing operations of the County. However, approximately \$3.5 million is bondable revenue, which could be pledged to pay debt service on a bond issue of \$50 million over 25 years.

State Revenue Sharing dollars are also distributed to the counties by allocation formula. In FY 2011, \$6.6 million was split between the General Fund and the Transportation Trust Fund. The Guaranteed Entitlement portion of the State Revenue Sharing revenue dollars are generated from taxes on cigarettes and sales and use tax and totaled \$2,223,734. The Guaranteed Entitlement revenues are expended as part of the County's operating budget, and any funds required to pay debt service on bonds secured by this revenue source would need to be replaced in the current year budget. However, approximately \$2.6 million is bondable revenue and could be pledged to pay debt service on a bond issue of \$37 million for 25 years, or \$40 million over 30 years.

Volusia County levies a 5.22% Communications Service Tax on the retail sale of communication services that originate and terminate in the State of Florida, and are billed to addresses in unincorporated Volusia County. Services charged encompass all voice, data, audio, video, or any information or signals, including cable services that are transmitted by any medium. The State Department of Revenue collects and remits the Communications Service Tax to local jurisdictions less an administrative service charge. Volusia County also levies a 10% public service tax (PST) on electricity and metered or bottled gas in the unincorporated area. Revenues generated from these taxes are programmed as general MSD funds and are used to fund the current operating budget. Yet, \$4 million in Communications Services tax is bondable revenue and could support debt service on a bond issue of \$41 million for 25 years or \$45 million over 30 years. And, \$7.3 million of PST revenue would support debt service on a bond issue of \$75 million for 25 years, or \$82 million over 30 years.

KEY DEBT RATIOS
FISCAL YEAR ENDING SEPTEMBER 30, 2011

Management takes a planned approach to the management of the County’s finances. Quarterly monitoring, annual trend analysis of the County’s financial condition and multi-year forecasting help identify any emerging financial concerns. Evaluating the long-term impact of financing options also helps management make informed decisions when recommending the issuance of debt for capital spending. Maintaining strong fiscal health helps provide financial flexibility and protection from economic changes or unanticipated expenditures.

Debt ratios are among the analytical measures used by credit agencies to evaluate the financial strength of entities. Management also reviews these ratios annually to evaluate the County’s debt profile. The County has maintained a relatively low amount of debt and key indicators show favorable trends as shown in the following table.

	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
General Obligation Debt	\$38,190,000	\$36,245,000	\$34,230,000	\$32,145,000	\$29,985,000
General Obligation Debt Per Capita	\$75.17	\$70.04	\$66.39	\$63.16	\$60.45
Non-Self Supporting Revenue Debt	\$220,950,000	\$209,265,000	\$201,915,000	\$186,405,000	\$177,757,000
Non-Self Supporting Revenue Debt Per Capita	\$434.93	\$404.36	\$391.64	\$366.28	\$358.35
Direct Debt [1]	\$278,708,564	\$259,597,580	\$262,309,675	\$236,635,491	\$223,027,933
Direct Debt Per Capita	\$549	\$502	\$509	\$465	\$450
Debt per Capita as a % of Personal Income per Capita	2.21%	1.97%	2.03%	1.94%	1.90%

[1]Includes: Non-self supporting debt [less unamortized bond costs] and Notes Payable.

RESTRUCTURING OF DEBT

There are usually three major reasons for restructuring debt: to reduce the issuer's interest costs, to restructure debt service; or to remove a burdensome or restrictive covenant imposed by the terms of the bonds being refinanced. Due to the legal, financial advisory, and issuance costs associated with the issuance of the new refunding bond, present value savings should be calculated to determine whether a refunding is financially feasible. The following is a brief discussion of restructuring methods.

- *Refunding* – A process whereby an issuer refinances an outstanding bond issue by issuing new bonds. The proceeds of the new bond issue either are used to immediately retire the outstanding obligations or are used to purchase a portfolio of U.S. Treasury securities whose cash flows are used to pay off the remaining debt service of the old, refunded bonds until they are called or mature.
 - *Current Refunding* – a refunding in which the prior, refunded bonds are called or mature within 90 days of issuance of the refunding bonds.
 - *Advance Refunding* – the prior, refunded bonds remain outstanding until maturity or their first call date. The maturity or call date may be years in the future. Governmental bonds are generally limited to one advance refunding.
 - *Forward Refunding* – the issuer may lock in existing low interest rates and refund the bonds on their first call date. Therefore, all the terms of the transaction are agreed upon today, but the transaction does not occur until the first day of the current refunding period.
- *Defeasance* – To discharge the lien of an indenture relating to a bond issue and, in the process, render inoperative restrictions under which the issuer has been obligated to comply. Ordinarily, an issuer may defease an indenture requirement by depositing with a trustee an amount sufficient fully to pay all amounts under a bond contract as they become due. When defeased, the security lien of an indenture is released, and the debt is legally satisfied even though it may not have been formally retired.

On December 6, 2010, the county refinanced all of its outstanding commercial paper to enter into a fixed loan agreement (Capital Improvement Revenue Note, Series 2010) with JPMorgan Chase Bank, N.A.. The loan amount of \$17,750,000 with a fixed interest rate of 3.02 percent refunded seven installment purchase agreements whose total remaining principal balance equaled \$17,750,000. This note refinanced the following projects: Ocean Center expansion (\$9,875,000), improvements for Capri Drive and West Highlands Special Assessment Districts (\$1,790,000), acquisition and construction of trails (\$4,724,000), and land acquisition at the Daytona Beach International Airport (\$1,361,000). The economic gain or present value savings over the life of the loan is \$199,217.

ARBITRAGE

Arbitrage refers to the profit earned by investing tax-exempt bond funds in higher yielding investments. Under Federal arbitrage regulations, an issuer of tax-exempt bonds is allowed to earn this profit for a certain period of time during the construction of the related project. If the issuer still has bond funds once this time period expires, the profit is subject to rebate to the Federal government and the remaining bond funds should be invested at rates lower than its bond yield.¹

In FY 2011 the county received an updated arbitrage rebate determination on the Limited Tax General Obligation Bonds, Series 2005. It was determined that an arbitrage rebate liability had accrued in the amount of \$162,989, of which 90 percent, or \$146,690, was paid to the IRS as required.

The following pages contain a table of arbitrage rebate calculation due dates.

<u>Trails</u>					
Trails Program	Capital Improvement Revenue Note, Series 2010	4,724,000	3.02%	4,724,000	12/2021
Total				\$23,371,000	

State Infrastructure Bank (SIB)

The county has been a partner of the Central Florida Commuter Rail Commission since 2007. As a commission partner, the county entered into two loan agreements with the Florida Department of Transportation (FDOT) State Infrastructure Bank (SIB) to finance an assigned portion of the acquisition and construction costs of the commuter rail system. The county received approval for two State Infrastructure Bank (SIB) loans totaling \$12.5 million for Phase I construction. Draws for Phase I construction began in February 2011 and totaled \$5.6 million by fiscal year end. Volusia County intends to apply for an additional \$12.4 million SIB loan in the summer of 2012 to complete Phase II construction. Commuter service is projected to begin in 2013.

Capital Improvement Revenue Note, Series 2010

In November 2011 County Council approved the refinancing of seven installment purchase agreements whose total remaining principal balance equaled \$17,750,000. These notes had been issued by the Florida Association of Counties (Commercial Paper Program) to acquire or construct various improvements. The refinanced notes were issued as the Capital Improvement Revenue Note, Series 2010 through JP Morgan, Chase at a favorable fixed rate of 3.02%.

Redemption

On January 20, 2011, the County Council approved the redemption of the remaining installment purchase agreements originally issued through the Florida Association of Counties commercial paper program for the purchase of computer equipment for the criminal justice information system. The remaining obligation of \$8,012,000 was paid on February 8, 2011.

State Revolving Fund (SRF) Loans

The State of Florida makes low cost loans to local governments to finance the construction of wastewater pollution control facilities. Eligible projects include new construction and/or improvements to wastewater sewer systems, sewerage pump stations, sewerage treatment facilities, reclaimed water reuse facilities, and estuary protection facilities. Disbursements are made to project sponsors after costs are incurred. Interest rates on these projects ranged from 2.99% - 3.24%. These loans are for a 20 year term.

Loan Description	Loan Number	Loan Amount	Interest Rate	Balance Outstanding	Final Payment Date
SE Wastewater Facilities	CS12061701P	\$9,023,326	3.24%	\$4,196,586	02/2020

CONDUIT DEBT OBLIGATIONS¹

Four entities have been established for the sole purpose of providing financial assistance to private-sector entities to acquire or construct equipment and facilities deemed to be in the public interest. The four entities and their purposes are:

- **Volusia County Health Facilities Authority** – provide financing for health care facilities and services available to the citizens of Volusia County.
- **Housing Finance Authority of Volusia County** – provide financing to alleviate the shortage of affordable rental housing and residential housing facilities for low and moderate income families and individuals, and to provide capital for investment in such housing facilities.
- **Volusia County Industrial Development Authority** – provide financing for the purpose of fostering economic development with Volusia County.
- **Volusia County Educational Facilities Authority** – provide financing for higher education projects required or useful for the instruction of students or the operation of an institution of higher education in Volusia County.

Bonds issued on behalf of the entities are not deemed to constitute a debt of the County of Volusia, the State of Florida, or any political subdivision thereof. Bonds or other debt obligations are payable solely from the revenues or other resources pledged under the terms of the debt agreements.

A summary of outstanding issues at September 30, 2011 is comprised of the following:

Entity	Number of Series Outstanding	Original Issued	Aggregate Principal Outstanding
Volusia County Health Facilities Authority	1	33,275,000	20,640,000
Housing Finance Authority of Volusia County	13	94,175,000	83,035,000
Volusia County Industrial Development Authority	6	55,365,000	53,445,894
Volusia County Educational Facilities Authority	5	234,670,000	209,645,000

County of Volusia, Florida

DEBT MANAGEMENT POLICY

Mission Statement

To provide a comprehensive and viable debt management policy which recognizes the capital improvement needs of the County as well as the taxpayers' ability to pay while taking into account existing legal, economic, financial and debt market considerations.

General Policy Overview

The basic purpose of a debt management policy is to assist the government in the execution of its overall strategy by contributing to the continued financial health and stability of the organization and assuring future access to debt markets to meet both scheduled and unscheduled needs. In practice, the limits within which a debt management policy can be developed and implemented are usually very confined. Despite these limitations, it is the responsibility of each local government to develop a policy which, at a minimum, provides a conceptual framework for the issuance and management of debt.

The legal, economic, financial and market conditions associated with the issuance of debt are dynamic, unpredictable and usually in a constant mode of change. Consequently, the decision to issue debt is best made on a case-by-case basis and only after careful and timely analysis and evaluation of all relevant factors. Some of the factors that should be considered include, but are not limited to, the following:

- Legal constraints on debt capacity and various financing alternatives.
- The urgency of the capital requirements to be met and the economic costs of delays.
- Willingness and financial ability of the taxpayers to pay for the capital improvements.
- Determination as to whether to employ a “pay as you acquire” versus a “pay as you use” approach.
- Proper balance between internal and external financing.
- Current interest rates and other market considerations.
- The financial condition of the County.
- The types, availability and stability of revenues to be pledged for repayment of the debt.
- Type of debt to be issued.
- The nature of the projects to be financed (i.e., approved schedule of improvements, non-recurring improvements, etc.)

Debt Management Policies

- (1) Capital improvements related to enterprise fund operations (e.g., airport, water and wastewater systems, refuse disposal systems, etc.) if financed by debt, it should be repaid solely from user fees and charges generated from the respective enterprise fund operation.
- (2) Capital improvements not related to enterprise fund operations (e.g., parks, public buildings, etc.) may be financed by debt to be repaid from available revenue sources (including ad valorem taxes) pledgeable for same.
- (3) Cash surpluses, to the extent available and appropriable, should be used to finance scheduled capital improvements.
- (4) The County will issue debt only for the purposes of constructing or acquiring capital improvements (the approved schedule of capital improvements) and for making major renovations to existing capital improvements.
- (5) All capital improvements financed through the issuance of debt will be financed for a period not to exceed the useful life of the improvements, but in no event to exceed 30 years.
- (6) The County shall not construct or acquire a public facility if it is unable to adequately provide for the subsequent annual operation and maintenance costs of the facility.
- (7) The County will at all times manage its debt and sustain its financial position in order to seek and maintain the highest credit rating possible.
- (8) The County should consider coordinating with other local government entities to the fullest extent possible, so as to minimize the overlapping debt burden to citizens.
- (9) The County will ensure that an adequate system of internal control exists so as to provide reasonable assurance as to compliance with appropriate laws, rules, regulations, and covenants associated with outstanding debt.
- (10) Revenue sources will only be pledged for debt when legally available and, in those situations where they have previously been used for operation and maintenance expenses/general operating expenditures, they will only be pledged for debt when other sufficient revenue sources are available to replace same to meet operation and maintenance expenses/general operating expenditures.
- (11) The County will market its debt through the use of competitive bid whenever deemed feasible, cost effective and advantageous to do so. However, it is recognized that, in some situations, certain complexities and intricacies of a particular debt issue are such that it may be advantageous to market the debt via negotiated sale.

Debt Management Policies (Cont'd)

- (12) The County will continually monitor its outstanding debt in relation to existing conditions in the debt market and will refund any outstanding debt when sufficient cost savings can be realized.
- (13) Credit enhancements (insurance, letters of credit, etc.) will be used only in those instances where the anticipated present value savings in terms of reduced interest expense exceeds the cost of the credit enhancement.
- (14) In order to maintain a stable debt service burden, the County will attempt to issue debt that carries a fixed interest rate. However, it is recognized that certain circumstances may warrant the issuance of variable rate debt. In those instances, the County should attempt to stabilize debt service payments through the use of an appropriate stabilization arrangement.

GLOSSARY OF TERMS

Advance Refunding. Bonds are issued to refund an outstanding bond issue prior to the date on which the outstanding bonds become due or callable. Proceeds of the advance refunding bonds are deposited in escrow with a fiduciary institution, invested in U. S. Treasury Bonds or other authorized securities, and used to redeem the underlying bonds at maturity or call date and to pay interest on the bonds being refunded or the advance refunding bonds. Governmental bonds are generally limited to one advance refunding.

Annual Debt Service. The combined amount due in a fiscal year for payments of interest and current maturities of principal on outstanding debt.

Arbitrage. The difference between the tax-exempt interest rate paid by the borrower and the interest rate at which the proceeds of the issue are invested. The Internal Revenue Code contains specific regulations concerning the amount that can be earned from the investment of tax-exempt proceeds. Interest earnings that exceed the allowable amount must be paid to the federal government.

Basis Point. An expression of interest equal to one-hundredth of a percent (.01%). One hundred basis points equal one percent. Used in the pricing of bonds and in discussions of the yield of a bond.

Bond. A written promise to pay a specified sum of money, called the face value (par value) or principal amount, at a specified date or dates in the future, called the maturity date(s), together with

periodic interest at a specified rate. The difference between a note and a bond is that the bond runs for a longer period of time and requires greater legal formality.

Bond Counsel. The legal firm hired to advise the Issuer regarding the legal and tax aspects of the sale. Bond counsel writes the legal opinion for the bond issue. The legal opinion must be unconditional and is essential for a bond issue to be marketable. The bond opinion provides assurance to the bond purchaser that the bond was legally issued and is tax-exempt. Generally responsible for producing the legal documents required for the sale.

Bonded Debt. The portion of an issuer's total indebtedness represented by outstanding bonds of various types.

Bond Insurance. A form of credit enhancement that is provided by private, for-profit insurance companies. For a premium, insurance companies will agree to guarantee interest and principal payments to bondholders if the issuer cannot make payments. Bonds with insurance carry the credit rating of the insurer instead of the issuer, most typically AAA.

Bond Proceeds. The money paid to the issuer by the purchaser or underwriter of a new issue of municipal securities. These moneys are used to finance the project or purpose for which the securities were issued and to pay certain costs of issuance as may be provided in the bond contract.

Bond Rating. An independent assessment of the relative credit risk associated with purchasing and holding a particular bond, and the likelihood that the obligation will be repaid on-time and in full.

Call or Call Provision. The conditions under which a debt obligation may be redeemed prior to its stated maturity. Such provisions specify the date on which an obligation may be redeemed and the price investors will receive if their bonds are redeemed.

Call Premium. The amount the issuer has promised to pay in excess of par value when bonds are redeemed in advance of their maturity date. The call premium is expressed as a percent of the par value.

Commercial Paper. Short term, unsecured promissory notes issued by organizations of recognized credit quality.

Conduit Bonds. Bonds issued on behalf of entities established to provide financial assistance to private-sector entities to acquire or construct equipment and facilities deemed to be in the public interest. (This debt does not constitute debt of the County of Volusia. Bonds or other debt obligations are payable solely from the revenues or other resources pledged under the terms of the debt agreements.)

Cost of Issuance. The expense associated with the sale of a new issue of municipal securities, including such items as underwriter's spread, printing, legal fees and rating costs.

Coverage. The ratio of pledged revenues available annually to pay the debt service requirement. This ratio is one indication of the availability of revenues for payment of debt service. The formula for determining coverage, often referred to as "debt service coverage" or the "coverage ratio," is as follows:

$$\text{Coverage} = \frac{\text{Pledged Revenues}}{\text{Debt Service Requirement}}$$

Coverage Covenant. A pledge by the issuer, in the trust indenture of bond resolution, to maintain a specified level of coverage of debt service requirements from pledged revenues.

Credit Enhancement. A guarantee by a third party in a debt financing that strengthens the credit quality behind the obligation.

Credit Rating Agency. Agencies hired to appraise, analyze and monitor the credit quality of the bond issuer. These firms provide credit ratings for use by retail and institutional investors to gauge the credit risks inherent in the bond issue. The fee for the rating service is paid by the issuer and based on the issue size, type and complexity.

Current Refunding. A refunding in which the prior, refunded bonds are called or mature within 90 days of issuance of the refunding bonds.

CUSIP Numbers (Committee on Uniform Security Identification Procedures). Identification numbers assigned each maturity of a bond issue, and usually printed on the face of each individual bond in the issue. The CUSIP numbers are intended to facilitate identification and clearance of municipal securities.

Dated Date. The date on which a debt obligation begins to accrue interest. For example, if a bond issue was dated July 1 and was delivered to the purchaser (closed) on July 14, the purchaser would need to pay the issuer accrued interest from the dated date (July 1) up to but not including the delivery date (July 14).

Debt Service. The amounts of money necessary to pay interest and principal requirements for a given year or series of years.

Defease. To discharge the lien of an ordinance, resolution, or indenture relating to a bond issue and, in the process, render inoperative restrictions under which the issuer has been obligated to comply. Ordinarily, an issuer may defease an indenture requirement by depositing with a trustee an amount sufficient to fully pay all amounts under a bond contract as they become due.

Delivery Date. The date on which securities are delivered in exchange for proceeds. The delivery date is considered the date of issuance for new securities and is also known as the closing date.

Direct Debt. Any non-self-supporting general governmental debt.

Discount. The amount by which par value exceeds the price paid for a security and which generally represents the difference between the nominal interest rate and the actual or effective return to the investor.

Effective Interest Rate. The actual rate earned by the investor on bonds purchased, after allowing for premiums,

discounts or accrued interest over the period of the investment.

Escrow Account. A fund established to hold moneys pledged and to be used to pay debt service on an outstanding issue.

Financial Condition. The probability that a government will meet both its financial obligations to creditors, consumers, employees, taxpayers, suppliers, constituents, and others as they become due; and service obligations to constituents, both currently and in the future. (Source: Governmental Accounting Standards Board - GASB)

Forward Refunding. A process whereby an issuer may take advantage of low interest rates by locking in at the lower interest rates and refund the bonds on their first call date. Therefore, all the terms of the transaction are agreed upon today, but the transaction does not occur until the first day of the current refunding period.

Full Faith and Credit. An unconditional pledge of a government's taxing power that secures general obligation bonds. Bonds carrying such pledges are usually referred to as general obligation bonds or full faith and credit bonds.

General Obligation ("G.O.") Bonds. Bonds for which the payment is backed by the full faith and credit of the issuing entity. The full faith and credit is a pledge of the general taxing powers for the payment of the debt obligation. Some GO bonds, known as limited-tax GO bonds, are backed by the pledge of a defined portion of the issuer's general taxing power.

Good Faith Deposit. A sum of money, usually in an amount from 1 percent to 5 percent of the par value of the bond issue, and generally in the form of a certified or cashier's check, which is enclosed with the bid in a competitive sale. The check is returned to the bidder if the bid is not accepted, but the check of the successful bidder is retained by the issuer and applied against the purchase price when the bonds are delivered.

Interest. Compensation paid or to be paid for the use of money. It is generally expressed as an annual percentage rate.

Interest Rate. The annual percentage of principal payable for the use of borrowed money.

Issuer. A state, political subdivision, agency or authority that borrows money through the sale of bonds or notes.

Lease-Purchase Agreement. An agreement entered into by two parties in which one provides a facility or equipment in exchange for a pledge from the other to make regular lease payments. Upon completion of the lease term, the lessee assumes ownership of the item. Most lease-purchase agreements provide that the lessee will continue to make lease payments only as long as its governing body appropriates funds for that purpose.

Legal Opinion. An opinion concerning the legality of a municipal bond issue. Such opinions usually address the legal authority of the issuer to sell bonds, the issuer's compliance with all procedural requirements prior to issuance, and the tax status of the bonds as an investment.

Limited Tax Bond. A general obligation bond secured by the pledge of a specified tax or category of taxes which is limited as to rate or amount.

Long-term Debt. Debt with a maturity of more than one year after date of issuance.

Maturity. The date when the principal amount of a security is payable.

Maximum Annual Debt Service. The largest combined amount of the annual debt service becoming due in any fiscal year in which bonds are outstanding, excluding all fiscal years which have ended prior to the fiscal year in which the maximum annual debt service is computed.

Municipal Bond. A debt obligation issued by a state or local government, to provide funds for a government's general financing needs or for special projects. Municipal bonds are free from federal tax on the accrued interest and also free from state and local taxes if issued in the state of residence.

Municipal Securities Rule Making Board (MSRB). An independent, self-regulatory organization established by Congress in 1975 having general rule making authority over municipal securities market participants.

Negotiated Sale. The sale of a new issue of municipal securities by an issuer through an exclusive agreement with an underwriter or underwriting syndicate selected by the issuer. The primary points of negotiation for an issuer are the interest rate and purchase price on the issue.

Official Statement. A disclosure document prepared in connection with a specific offering which provides detailed information concerning security provisions, maturity dates and amounts, optional redemption provisions, ratings, coupon rates and reoffering yields, and other relevant credit data. The official statement is prepared and circulated after the sale has been completed. (See “Preliminary Official Statement”.)

Par Value. The face or amount of the principal of a bond or note.

Per Capita. In Latin translation, per head – per person.

Preliminary Official Statement. A disclosure document prepared in connection with a specific offering that provides detailed information concerning security provisions, maturity dates and amounts, optional redemption provision, and other relevant credit data. The preliminary official statement is prepared and circulated as a marketing tool prior to the sale of the securities. (See “Official Statement”.)

Premium. The amount by which the price of a bond exceeds its Principal amount or Par value. A redemption premium is the premium an issuer is required (by the terms of a bond) to pay to redeem (call) the bond prior to its stated maturity.

Present Value. The value today of a future payment, or stream of payments, discounted at some appropriate compound interest (or discount) rate. Also called the time value of money.

Principal. The face amount of a debt instrument on which interest is either owed or earned.

Ratings Agencies. The organizations that provide publicly available ratings of the credit quality of securities issuers. The term is most often used to refer to the three nationally recognized agencies, Moody’s Investors Service, Inc., Standard and Poor’s Corporation, and Fitch Ratings.

Ratings. Designations of the quality of bonds or notes issued by state and local governmental units. Ratings are provided by agencies or corporations that seek to render a professional judgment concerning the quality of the security being rated.

Refunding. A process whereby an issuer refinances an outstanding bond issue by issuing new bonds. The refunding bonds may be sold for cash and outstanding bonds redeemed in cash, or the refunding bonds may be exchanged with holders of outstanding bonds.

Reserve. An account used to indicate that a portion of fund equity is legally restricted for a specific purpose or not available for appropriation and subsequent spending.

Revenue Bond. A bond which is payable from a specific source of revenue and to which the full faith and credit of an issuer with taxing power is not pledged. Revenue bonds are payable from identified sources of revenue, and do not permit the bondholders to compel taxation or legislative appropriation of funds not pledged for payment of debt service. Generally, no voter approval is required prior to issuance of such obligations.

Revolving Loan Fund. A centrally administered (usually by a state) fund that makes loans to subordinate units of government to address specific funding objectives. Loan repayments are recycled into additional loans. Original capitalization often comes from a combination of federal grants and state monies.

Securities. Bonds, notes mortgages, or other forms of negotiable or non-negotiable instruments.

Sinking Funds. An account into which an issuer makes periodic deposits to assure timely availability of monies for the payment of debt service requirements. The sinking fund was the fund created to accumulate moneys to “sink” the debt at its maturity.

SLGS. An acronym for “State and Local Government Series.” SLGS are special United States Government securities sold by the Treasury to states, municipalities and other local government bodies through individual subscription agreements. The interest rates and maturities of SLGS are arranged to comply with arbitrage restrictions imposed under Section 103 of the Internal Revenue Code. SLGS are most commonly used for deposit in escrow in connection with the issuance of refunding bonds.

Special Assessment Bond. A municipal general obligation bond whose debt service is paid by a special tax or assessment on property in a particular locality because that property receives a special benefit due to some public improvement, separate and apart from the general benefit accruing to the public at large.

Subordinated Debt Instrument. A debt instrument requiring that repayment of principal may not be made until another debt instrument senior to it has been repaid in full.

Underlying Rating. An assessment of a bond’s credit, without considering external credit enhancements. For an insured bond issue, the underlying rating is the rating the issue would receive if it had no insurance.

Yield. The rate earned on an investment based on the price paid for the investment, the interest earned during the period held and the selling price or redemption value of the investment.
