Although Volusia County's unemployment rate is notably lower than both the State and National averages, our average per capita income is lower as well. This trend is indicative of our growing tourism industry and demand for service related jobs. The County's commitment to improving Economic Development should result in higher paying jobs which will ultimately eliminate, if not reverse, the current per capita income gap that has steadily increased in recent years.

	Unemployment Rate

The Consumer Price Index (CPI) is an economic measure of inflation based on a "market basket" of goods and their corresponding changes in price from year to year. It exemplifies trends in the overall cost of doing business. Inflation affects all costs from personal wages to materials to borrowed money.
