

Environmental Management

Example of Storm Water/ Native Vegetation Retention Plan

If waterfront:

- a) There is a minimum of a 25' wetland buffer
- b) No stormwater retention is allowed in the wetland buffer
- c) Vegetation cannot be removed from the buffer

KEY

The specific species and quantity of plantings must be provided

- T** = Trees
- = Shrubs
- △ = Groundcover
- ~~~~~ = Flow of H₂O
- ▨ = Stormwater Retention

Info:

* Sod is only allowed after the 35% native vegetation requirement is satisfied.

NOT TO SCALE

Stm/Ret. Req. = 688 ϕ

Veg. Ret. Req. = 2,888 ϕ

A = 5' x 50' = 250 ϕ

C = 10' x 45' = 450 ϕ

B = 10' x 40' = 400 ϕ

1,100 ϕ total proposed
