EXECUTIVE SUMMARY

The Consolidated Annual Performance and Evaluation Report (CAPER) provides information on housing and community development activities in Volusia County for FY 2017/18. This is the third year annual performance report for the FY 2015-2019 Consolidated Plan. The five-year plan identified a number of needs, goals and objectives concerning community development and housing. The report describes Volusia County’s progress towards those identified goals for the period October 1, 2017 through September 30, 2018.

The CAPER was prepared by the Volusia County Community Assistance Division, Housing and Grants Administration Activity, and combines planning and reporting requirements for activities funded by the Community Development Block Grant (CDBG), HOME Investment Partnerships Program (HOME), and the Emergency Solutions Grant (ESG). Information is also included on the Neighborhood Stabilization Program (NSP) program.

This is a finalized published version of the third year CAPER. The CAPER is produced and submitted to the U.S. Department of Housing and Urban Development (HUD) through an online drawdown and reporting databased, the Integrated Disbursement and Information System (IDIS). The report is reformatted for public distribution. The entire document is available at the following locations:

- All Volusia County Library locations;
- Human Services New Smyrna Beach office;
- Human Services Orange City office;
- Community Assistance DeLand office; and
- Online at www.volusia.org/reports.

A draft version of the CAPER was available for public review and comment from November 19 until December 5, 2018.
The County of Volusia has made great strides in carrying out the third year of the strategic plan and the annual action plan. Several accomplishments during FY 2017/18 either met or exceeded the goals set forth in the Annual Action Plan. This is a third year report, therefore not all of the five year goals have been met. There are some activities that are underway, which were not considered when calculating this year’s accomplishments. Community development projects are continually implemented with CDBG funds, working with ten participating jurisdictions, primarily benefitting low- and moderate-income persons. During the 2017/18 fiscal year 100% of CDBG disbursements, other than administration, benefited low- and moderate-income persons. Housing assistance activities continue to be realized utilizing HOME, CDBG, NSP, SHIP and other available funding that provide decent and affordable housing in the community. This year several families were housed or were able to retain their housing using ESG rapid re-housing and homeless prevention funds. Remaining ESG funds are being used to continue assisting families, there are rapid re-housing and homeless prevention projects currently open and being implemented. This CAPER demonstrates that programs are meeting designated needs.

The chart shown on the following page, Con Plan Goals and Accomplishments, has been included to show the County of Volusia’s progress in completing both strategic plan goals and annual goals. The report was produced using IDIS. The system allows grantees and HUD to view a snapshot of the current status of the above mentioned grants. After producing the Con Plan Goals and Accomplishments report in IDIS, Community Assistance staff edited the report to remove errors, correct mistakes, add missing goals, and format the report for publishing in the CAPER.

Table 1 - Con Plan Goals and Accomplishments
Affordable housing goals and outcomes are discussed in detail in the CR-20 section on page 26. The annual goal for rapid re-housing was greatly surpassed; this was due to the subrecipient assisting more families than anticipated, as well as utilizing remaining prior year ESG funding for the program. Completing projects from prior program years caused the annual outcome of public facilities to exceed what was planned. A few consolidated plan goals were not allocated funds and therefore did not have anticipated outcomes for the 2017/18 program year, however two of those goals still have accomplishments reported due to projects that were planned for prior years being completed successfully this year; tenant based rental assistance and homeless prevention. The anticipated goal for housing rehabilitation was nine households, five with CDBG funds and four with HOME. The CDBG project was cancelled, however an additional housing project was created and is anticipated to be completed during the 2017/18 program year. HOME funds were allocated to rehabilitation to utilize as leverage with an anticipated CDBG-DR mobile home replacement program to assist residents with damage due to Hurricane Matthew. This program is expected to be awarded during the 2018/19 program year, allowing the HOME funds to be used as leverage as planned. Lastly, some goals were not met due to current year projects still being underway or not yet started. Several infrastructure, homeowner housing rehabilitation, creation of rental units, and rehabilitation administration activities are underway and expected to be completed during 2018/19.

ASSESS HOW THE JURISDICTION’S USE OF FUNDS, PARTICULARLY CDBG, ADDRESSES THE PRIORITIES AND SPECIFIC OBJECTIVES IDENTIFIED IN THE PLAN, GIVING SPECIAL ATTENTION TO THE HIGHEST PRIORITY ACTIVITIES IDENTIFIED.

Non-housing community development projects, funded with CDBG, worked toward the broad goal of creating a more suitable living environment. One of Volusia County’s highest priorities in this category is improving infrastructure, benefiting primarily low- and moderate-income persons. A total of $474,698 was expended to make infrastructure improvements, resulting in three completed streets, three sewer projects and three sidewalk projects. There are activities currently underway or starting soon that are contributing to the goal of infrastructure improvement as well; three sidewalks, a sewer, and two street improvement projects.

Improving public facilities is also a high priority. Volusia County’s CDBG program addressed this priority during the 2017 fiscal year by expending $1,097,338. Three neighborhood facility improvements and eight park improvement projects were completed during the year. At the end of the fiscal year, projects that are addressing the public facility need remain underway or are in the design phase; four parks and two
neighborhood facilities. Affordable housing has been designated as a priority in the five-year consolidated plan. CDBG funds have been set aside for housing rehabilitation to address the affordable housing goal. Specifically, a CDBG project is in the planning phase that will assist low- and moderate-income homeowners in abandoning their septic tank and connecting to available sewer lines.
The following table provides details of the racial and ethnic status of the people assisted during fiscal year 2017/18 with CDBG, HOME and ESG funds. Due to the nature of the direct benefit services provided in most CDBG and ESG activities, the data reported is individuals assisted rather than families. HOME characteristics are reported in terms of families, also called households.

The beneficiary data that is included in the table below is vastly different for CDBG activities than HOME or ESG. The characteristics of persons that benefit from both HOME and ESG activities are collected directly for each service and/or project completed during the program year, the same is not true for CDBG activities. The characteristics reported for CDBG activities are gathered using two different methods. For direct service activities, such as housing or youth public services, the information is collected from beneficiaries directly. For capital projects eligible because they benefit severely disabled persons, census data is used which shows the number of disabled persons in the area that will benefit and their racial and ethnic characteristics. Beneficiaries are not tracked according to characteristics for capital projects that show eligibility by benefitting an area with a population that is predominantly low- and moderate-income persons. This distinction is important for two reasons: the CDBG numbers in the table are high because they include the characteristics of disabled persons for large areas, and the total CDBG beneficiaries data in the table does not include all persons benefitting from completed CDBG activities.

</table>
When evaluating the racial and ethnic status of the families assisted it is important to consider the population within the jurisdiction as well as where funds have been spent. The geographic distribution of expended funds is discussed in section CR-15 on page 14. The series of maps on the following pages demonstrate data on the population throughout the Volusia County jurisdiction. Volusia County is geographically large; therefore the maps have been broken down by quadrants. Each quadrant map illustrates a number of features about the jurisdiction area: block groups which are primarily low- and moderate-income (LMI), block groups which have a LMI population of more than 75%, block groups which are concentrated with Black/African American or Hispanic populations, and jurisdiction boundaries.
Northeast Volusia County
Low-and Moderate-Income Block Group Populations & Block Groups with High Minority Concentration

Figure 1 - NE LMI & Concentration Map
Southeast Volusia County
Low-and Moderate-Income Block Group Populations & Block Groups with High Minority Concentration

Figure 2 - SE LMI & Concentration Map
Figure 3 - NW LMI & Concentration Map
Southwest Volusia County
Low-and Moderate-Income Block Group Populations & Block Groups with High Minority Concentration

Figure 4 - SW LMI & Concentration Map
The maps on the previous pages are an important visual depiction of the areas within the jurisdiction that have a population that are both concentrated by income and racial/ethnic identity. Volusia County has defined the term “minority concentration” as a block group with at least 20% more of an ethnic or racial group population than the jurisdiction as a whole, Black/African American and Hispanic are the only two racial/ethnic categories that meet this definition. Racial data by block group shown is gathered from the 2010 census. The LMI data used is from the 2007-2011 American Community Survey, as that is what is used to determine area eligibility for CDBG. The minority concentration data is also presented in tabular form in Table 3 on the following page.

There are three jurisdiction block groups that have minority concentrations as well as LMI populations greater than 75%. Block group 2 in the 907.02 census tract is in the Spring Hill area of DeLand, which lies within both unincorporated county and city boundaries. Spring Hill has been designated as a target area in our consolidated plan; this target area is discussed further in CR-15 on pages 15 and 16. Spring Hill is also a Community Redevelopment Area (CRA), which allows for targeted investment of real property. The Spring Hill Community Resource Center (CRC) is an important public service in the area that was allocated $24,652, all of which was expended during the 2017/18 program year. Block group 1 in census tract 906, within the City of DeLand, has a population with 28.07% Black/African American and 81.59% LMI and is served by the CRC.

A couple of concentrated block groups are notable due to their size. The Town of Pierson, which is not part of the entitlement program, along with the surrounding unincorporated area, make up two large block groups, 902.01/1 and 901.01/1, both are concentrated with Hispanic and LMI populations. These block groups are large, and the population is spread out in this part of the County. A large block group that is concentrated with Black/African American populations is located west of Daytona Beach and partially within the city boundaries. The referenced block group is largely undisturbed land, with only 1,000 people living in the sizeable 832.06/1 area; 28.50% of the population is LMI.

Table 4 - Resources Made Available

The above table shows funds available, including committed funds from prior year activities that were not yet complete at the start of the program year. All funds expended throughout the program year were used to work toward the goals set forth in the consolidated plan. Balances remaining are for projects that are currently underway or will start during the 2018/19 program year; these projects will continue to work toward the goals and priorities named in the consolidated plan. Volusia County also had other federal, state and local resources available to assist in completing the Annual Plan goals. The other resources that were available and the funds expended are summarized below.

The Volusia County Housing Choice Voucher Program (Section 8) program is operated by Volusia County Community Assistance Division. Rental assistance is provided to households whose income does not exceed 80% of area median income (AMI). The county's program expended approximately $1,516,763 for rental assistance during this program year.

Volusia County was awarded one-time allocations of Neighborhood Stabilization Program 1 and 3 funds from HUD in 2009 and 2011 respectively. These allocations continue to provide grant funds and program income to support housing activities that help stabilize neighborhoods which were hardest hit by the foreclosure crisis (“NSP target areas”). During this program year, the county had available $1,113,270 of NSP1/NSP3 grant and program income funds (from the resale of NSP homes). A total of $258,614 was expended in the NSP target areas to rehabilitate previously acquired foreclosed homes, and resell two rehabilitated homes to homebuyers with incomes that did not exceed 120% AMI (low to middle income). During this program year, with HUD’s approval, Community Assistance transferred $124,365 of earned NSP1 program income to its CDBG program in anticipation of closing out its NSP1 grant. These funds were budgeted to a CDBG project involving the reconstruction of a facility to be converted to a neighborhood library located at the Hope Place emergency shelter.

Community Assistance received a State Housing Initiative Program (SHIP) allocation of $1,573,208 for FY 2017/18, and more than $2,000,000 was available from previous years’ SHIP allocations and program...
income. These funds leveraged HOME funds used for homebuyer assistance, rental rehabilitation and housing rehabilitation.

Funded by the State of Florida, the Community Services Block Grant serves low-income individuals and families living in Volusia County. The CSBG program provides financial assistance, case management and referral services to low income persons. Working with clients to reach economic self-sufficiency through employment and educational opportunities is a priority of the CSBG program. A total of $268,025 in CSBG program funds were expended during the 2017/18 fiscal year for direct client services.

IDENTIFY THE GEOGRAPHIC DISTRIBUTION AND LOCATION OF INVESTMENTS

A series of maps on the subsequent pages illustrate the funds that have been expended throughout the jurisdiction area in the ESG, HOME, and CDBG programs. The figures shown include funds expended for projects that are underway, even if accomplishments were yet to be realized at the end of the fiscal year. Funding that is made available for affordable housing activities are available throughout the Volusia County Entitlement Community and are not specifically designated on a geographic basis. For CDBG funding, the County of Volusia entitlement community includes the unincorporated areas of Volusia County and 10 participating municipalities, excluding Daytona Beach, Deltona, Pierson, Port Orange, Ponce Inlet, and Oak Hill. Volusia County Council approves allocations to be distributed to each participating municipality; each municipality determines where funds will be invested in their community based upon their needs.

There are two target areas within Volusia County. The Westside in New Smyrna Beach is an area where the City of New Smyrna Beach has targeted their CDBG resources. Of the FY 2017/18 CDBG allocation, 4.96% was planned to be used in the Westside area. The expenditures were higher than expected, 7.62% of expenses, in this target area due prior year funding being used to complete several projects. A community resource center addition, two park projects and one sidewalk were completed within the Westside target area.

Funds totaling 1.20% of total CDBG expenditures were expended on projects in another target area, Spring Hill. The Spring Hill target area had a goal of 2.0%, actual expenditures were slightly lower than expected due to a $10,178 septic tank abandonment project being canceled. Within the Spring Hill area, a public service project at the Spring Hill Community Resource center was completed successfully, funds were utilized to pay staff costs.

LEVERAGING

Explain how federal funds leveraged additional resources (private, state and local funds), including a description of how matching requirements were satisfied, as well as how any publicly owned land or property located within the jurisdiction that were used to address the needs identified in the plan.

Federal funds provided through HOME, CDBG, and ESG were able to leverage additional resources during the fiscal year. As costs to complete activities exceed the amount of funding available for subrecipients and non-profit agencies, CDBG funds have leveraged local funding. While CDBG does not require match, subrecipients and non-profits have utilized other funding sources when bid proposals or the cost to provide services exceeds available funding amounts. While it is difficult to determine an exact amount of funds leveraged in the CDBG program; during the 2017/18 fiscal year subrecipients reported leveraging about $588,000 in jurisdiction and county funds to complete CDBG activities.

The HOME program was able to leverage federal funds received by providing an incentive to private and public lending institutions to make available additional financial resources to implement priority housing activities. The HOME program match requirements were satisfied using current year match from State Housing Initiatives Partnership (SHIP) funds invested in homebuyer assistance and housing rehabilitation with similar program and income requirements, as well as the prior years’ excess HOME match that had been reported on an ongoing basis.

Table 8 – Program Income

The HOME program works to ensure the inclusion, to the maximum extent possible, of minorities and women, and entities owned by minorities and women, in all HOME-funded and other federally funded housing contracts. The following required table collects information on the number and value of contracts for HOME projects completed during the program year.

HOME funds were used in combination with other funds to complete the construction of four units of affordable homeowner housing by Southeast Volusia Habitat for Humanity. The primary use of HOME funds during this program year was for homebuyer assistance, which is awarded to a homebuyer, not a contractor; and loans to non-profit housing developers to assist with the financing to acquire rental housing.

DISCUSS THE DIFFERENCE BETWEEN GOALS AND OUTCOMES AND PROBLEMS ENCOUNTERED IN MEETING THESE GOALS.

Volusia County, in its FY 2017/18 Annual Action Plan, planned to produce 93 affordable housing units in program year 2017/18, but actually produced 117 affordable housing units using both entitlement funds (HOME, ESG and CDBG) and State Housing Initiatives Partnership (SHIP) funds. It is difficult to match planned housing units with the actual number produced because we are spending several years of CDBG, HOME and ESG funding allocations during the same period. Our housing unit goals are based on our best
knowledge and ability of our staff, contractors, and developers to produce housing units in a timely manner. During the program year, the SHIP allocation received was higher than expected, leading to changes in the intended use of HOME funds and an increased number of households assisted with the acquisition of existing units.

Additionally, we exceeded planned goals for rental assistance using HOME and ESG funds. We planned to use ESG funds to provide rapid re-housing rental assistance to 10 homeless households and HOME funds to provide TBRA to 10 households, but actually served a combined 63 households with rental assistance to prevent homelessness. The Volusia County TRBA activity is underway.

We plan to continue to assist with housing rehabilitation using SHIP funds. The County has seen a significant increase in SHIP funding over the past two years, and therefore this increase required a realignment of funding allocated to different housing strategies. The local home sales marketplace continues to be affordable for low-moderate income first-time homebuyers purchasing with assistance from the County.

DISCUSS HOW THESE OUTCOMES WILL IMPACT FUTURE ANNUAL ACTION PLANS.

It is always difficult to match planned housing units with the actual number produced because Volusia County usually expends funds from more than one year of its HOME allocation during the same period to produce affordable housing. Our housing unit goals are based on our best knowledge and ability of our staff, contractors, and developers to produce housing units in a timely manner. In reviewing this year’s outcomes, we will continue to invest funds in homeowner rehabilitation and homebuyer assistance as these strategies have proven to be an effective and efficient investment that produces affordable housing units.

In addition to the federal formula grant resources Community Assistance also used Neighborhood Stabilization Program 3 funds to support its affordable housing goals for households with low-middle incomes. Community Assistance used NSP3 grant fund balances and program income to continue towards completing the project that uses NSP3 funds to acquire and rehabilitate foreclosed homes in the NSP target areas of Volusia County. Two homes were resold to first-time homebuyers whose incomes did not exceed 120% of the area median income during this past year.
INCLUDE THE NUMBER OF EXTREMELY LOW-INCOME, LOW-INCOME, AND MODERATE-INCOME PERSONS SERVED BY EACH ACTIVITY WHERE INFORMATION ON INCOME BY FAMILY SIZE IS REQUIRED TO DETERMINE THE ELIGIBILITY OF THE ACTIVITY.

<td><strong>62</strong></td>
</tr>
</tbody>
</table>

*Table 14 – Number of Persons Served*

The above table provides data on the income level of the households assisted with housing that were completed during the year. Volusia County defines its worst case housing needs as renter and owner households in the lowest income category with housing needs. The lowest income category includes households with income that is less than 30% of area median income (AMI). Volusia County used both federal and state housing grants to serve owner households at 30% or less of AMI as part of other critical housing activities; owner-occupied housing rehabilitation and deferred mortgage loans to assist with the purchase of a home. Volusia County’s CDBG and HOME program do not have specific strategies in place to target those with disabilities that have housing needs; however, 20% percentage of SHIP funds must be strategically targeted to those with special needs.
Evaluate the jurisdiction’s progress in meeting its specific objectives for reducing and ending homelessness through:

REACHING OUT TO HOMELESS PERSONS (ESPECIALLY UNSHELTERED PERSONS) AND ASSESSING THEIR INDIVIDUAL NEEDS

The Commission on Homelessness (CoH) for Volusia and Flagler Counties represents the FL-504 CoC, and is referred to as such in this plan. The lead agency for the CoH, which serves Volusia County, is the Volusia/Flagler County Coalition for the Homeless (VFCCH). The CoH is responsible for conducting the annual count of the homeless and for identifying the gaps in available housing and services to the subpopulations of homeless, and strategically planning and organizing the expansion of housing and supportive services to meet the needs. These “gaps” are missing services that are needed to ensure that clients can successfully exit homelessness.

Taking direction from CoH’s strategic plan, the mission to provide outreach to the homeless and inform them of the network of services available to them has been accomplished by many groups in the community, including volunteers, agency providers, churches, veteran’s counselors and the 2-1-1 First Call for Help system.

Homeless providers which are part of the Continuum of Care (CoC), made the following services available:

Hope Place: provides housing and supportive services to homeless families with children and medically needy homeless individuals.

Halifax Urban Ministries (HUM) Center Homeless Direct Services: helps to meet the basic needs of homeless people by providing assistance with bicycles, bus passes, case management, clothing, applying for and obtaining birth certificates and identification, haircuts, medical services, internet access, laundry and showers.

I-Dignity Program: provides assistance in obtaining Florida ID cards, birth certificates and social security cards with assistance from legal counsel and the U.S. Department of Veterans affairs.

Stewart Marchman Act Behavioral Healthcare: through a partnership with West Volusia Hospital Authority homeless individuals receive psychiatric medications and consultation.

Salvation Army provides street outreach for veterans and other individuals in order to identify and qualify them for direct services and placement in appropriate housing programs as identified by their intake/needs assessment.
HMIS: captures client information on the homeless in an attempt to meet their needs through better information to guide them through the delivery system. HMIS creates client records and serves as a conduit for the homeless to crossover from the street to needed services.

**ADDRESSING THE EMERGENCY SHELTER AND TRANSITIONAL HOUSING NEEDS OF HOMELESS PERSONS**

A priority consistently stated throughout the strategic plan is the need to, “create permanent housing since emergency shelter is its costly alternative and persons often stay too long in emergency shelter because transitional facilities are not available.” The plan specifically calls for the creation of sufficient emergency shelters for single men, women, and families with children. Currently, the following agencies provide emergency shelter beds and services to families, individuals, youth and the special needs population: Domestic Abuse Council dba Beacon Center, The Salvation Army, The Neighborhood Center and Hope Place. In addition, the County of Volusia has contributed toward the construction and operation of two new emergency shelters, one of which is currently underway.

Hope Place opened earlier this year and provides temporary and transitional housing and services to homeless unaccompanied youth under the age of 26 and families with children. The First Step shelter, currently under construction, will accommodate up to 100 homeless individuals. The Deland shelter, construction expected in 2019, will accommodate up to 20 homeless individuals with short-term overnight lodging, food and water, access to non-emergency health care and social services programs.

A variety of agencies offer not only transitional housing, but diverse supportive services that will help the homeless transition to permanent housing with skills to live independently and preventing them from becoming homeless again. The services include referrals to other agencies for drug and mental health counseling, and education/skills development that will lead to employment and independent living. The length of stay in a transitional housing facility is between six and 24 months. The following agencies provide transitional housing services: Halifax Urban Ministries (HUM), The Salvation Army, Family Renew Community, The Restoration House (AME Church) in Daytona Beach, and Ormond Alliance Church in Ormond Beach.

The Commission on Homelessness has been extremely successful in obtaining supportive housing program funds for Volusia County to narrow the gap in obtaining transitional and supportive services for populations, including those with special needs. All programs utilize the Coordinated Entry System facilitated by the Volusia Flagler County Coalition for the Homeless to link individuals and families to permanent housing solutions.
HELPING LOW-INCOME INDIVIDUALS AND FAMILIES AVOID BECOMING HOMELESS, ESPECIALLY EXTREMELY LOW-INCOME INDIVIDUALS AND FAMILIES AND THOSE WHO ARE: LIKELY TO BECOME HOMELESS AFTER BEING DISCHARGED FROM PUBLICLY FUNDED INSTITUTIONS AND SYSTEMS OF CARE (SUCH AS HEALTH CARE FACILITIES, MENTAL HEALTH FACILITIES, FOSTER CARE AND OTHER YOUTH FACILITIES, AND CORRECTIONS PROGRAMS AND INSTITUTIONS); AND, RECEIVING ASSISTANCE FROM PUBLIC OR PRIVATE AGENCIES THAT ADDRESS HOUSING, HEALTH, SOCIAL SERVICES, EMPLOYMENT, EDUCATION, OR YOUTH NEEDS

Rapid re-housing and homeless prevention are vital in addressing homelessness. Rapid re-housing assistance helps extremely low-income individuals and families who are homeless move as quickly as possible into permanent housing, whereas homeless prevention assists low-income individuals and families who are imminent risk of becoming homeless. In both circumstances, stability is achieved through a combination of rental assistance and supportive services. Emergency Solutions Grant (ESG) funds have been used successfully throughout the program year to help extremely low-income households move into permanent housing and to assist those who are at risk of homelessness remain housed.

The CoH implemented the Coordinated Entry system-wide approach which was used as a referral system to assist 46 households during the 2017/18 fiscal year. The main barrier to helping families is the amount of funds available for staff costs to implement the program. The ESG allocation is fairly small and has an administration spending cap of 7.5%. Implementing a small scale project with low administration costs can be difficult. To address this barrier Volusia County partnered with two agencies that were already providing rapid re-housing and homeless prevention services and had the staff capacity to assist additional households. Both agencies were given oversight, technical assistance, and were reimbursed for eligible expenses within the ESG written standards. This adjustment increased the capacity of the VFCCH by implementing a successful rapid re-housing and homeless prevention program.

HOME funds received from the Florida Housing Finance Corporation were used to implement a tenant based rental assistance program (TBRA). The TBRA program was implemented by Community Assistance and Human Services staff. These funds provided permanent rental assistance to 17 income-eligible households in need of rental housing for twelve months. Human Services provides and helps families locate resources for housing, health, and social services. Many of the families assisted with ESG and HOME funds have been receiving other types of assistance prior to being a part of the rapid re-housing, homeless prevention, and TBRA programs.

In addition to rapid re-housing and homeless prevention, permanent supportive housing is a very important strategy in preventing homelessness for a specific vulnerable group of people, those in need of
case management and supportive services. Permanent supportive housing is one of the services allowable through HUD’s competitive application process. Currently, there are several agencies that are able to provide permanent supportive housing in Volusia County as recipients of the competitive process: The Neighborhood Center, Salvation Army, Halifax Urban Ministries, Stewart Marchman Act and VFCCH.

HELPING HOMELESS PERSONS (ESPECIALLY CHRONICALLY HOMELESS INDIVIDUALS AND FAMILIES, FAMILIES WITH CHILDREN, VETERANS AND THEIR FAMILIES, AND UNACCOMPANIED YOUTH) MAKE THE TRANSITION TO PERMANENT HOUSING AND INDEPENDENT LIVING, INCLUDING SHORTENING THE PERIOD OF TIME THAT INDIVIDUALS AND FAMILIES EXPERIENCE HOMELESSNESS, FACILITATING ACCESS FOR HOMELESS INDIVIDUALS AND FAMILIES TO AFFORDABLE HOUSING UNITS, AND PREVENTING INDIVIDUALS AND FAMILIES WHO WERE RECENTLY HOMELESS FROM BECOMING HOMELESS AGAIN

The following services are provided to make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

Domestic Abuse Council dba Beacon Center provides emergency shelter for victims of domestic violence and their children. Case management is provided to assist clients in securing permanent shelter.

The Neighborhood Center assists clients with the transition to permanent housing by first stabilizing the family with emergency housing including case management, food, counseling and referrals for additional family support. The Neighborhood Center also has permanent housing availability for direct referrals into housing that they facilitate through HUD CoC funding, HOME and privately funded sources. The Neighborhood Center works with the Volusia County School system to try to maintain school stability and keep the children in the same school. They also provide case management and a job search component to assist the client in securing employment.

Halifax Urban Ministries provides ESG as well as HUD CoC funded rapid re-housing. They provide rapid re-housing for swift placement of families and individuals who are in shelter programs, transitional programs or coming from the street directly into housing. They work to minimizing the amount of time a person or family experiences homelessness. Financial assistance is provided by assisting households with security deposits, utilities, and rent.

Halifax Urban Ministries recently created and opened its doors to a new facility called Hope Place. Hope Place provides temporary and transitional housing for homeless unaccompanied youth under the age of
twenty-six (26) years and for families with children. Hope Place also provides administrative and supportive services to those homeless families and unaccompanied youth residing on the property. The County of Volusia has contributed $3.8 million for the construction of Hope Place and has proposed to contribute up to $400,000 for operating costs.

The Salvation Army assists individuals with transition to permanent housing by first providing emergency shelter. While in the emergency shelter case managers perform outreach to clients interested in becoming involved in work readiness. Clients may become involved in the Daytona Downtown Streets Team Program and assist in street clean-up. Clients involved in the Daytona Downtown Streets Team Program may move into transitional housing as the next step toward permanent housing. Clients are assisted with work readiness and job searches. The Salvation Army also provides transitional housing services for veterans and partners with the VA case manager to access any VA benefits. The Salvation Army’s Supportive Services for Veteran Families (SSVF) program, also funded through the VA, provides rapid re-housing for veterans and their families into permanent housing. Outreach is also done to identify veterans and prevention services that will help maintain veterans placed though this grant.

Family Renew Community assists individuals with transition to permanent housing by first providing transitional shelter. While clients are in transitional shelter they are connected to all available mainstream benefits and services. They available services continue to assist the clients as they transition to permanent housing and independent living.
ACTIONS TAKEN TO ADDRESS THE NEEDS OF PUBLIC HOUSING

There are five public housing agencies in Volusia County. The DeLand Housing Authority (DHA), the New Smyrna Beach Housing Authority (NSBHA) and the Ormond Beach Housing Authority (OBHA) offer public housing and the Housing Choice Voucher Program (HCV), formerly Section 8 Rental Assistance, to eligible residents, while the County of Volusia offers only the HCV program. The Housing Authority of Daytona Beach is located in Volusia County but operates within the separate CDBG entitlement area of Daytona Beach.

The public and affordable housing units that are owned by the DHA are managed by Picerne Management. The Laurel Court Apartments, an eighty-unit project for elderly residents, are complete and the units were fully occupied by January 2016. The Laurel Villas family units were completed within the past five years. Therefore, the DHA continues to focus on maintenance and there are no pending capital improvement needs for owned housing units. The DHA secured a competitive award of 25 Mainstream vouchers from HUD this year. These vouchers will serve adult disabled households ranging in age from 18-61. If successful these vouchers can be renewed annually.

The New Smyrna Beach Housing Authority (NSBHA) has 126 units of public housing. The NSBHA is in the initial stages to request that HUD convert the funding for their public housing units to Rental Assistance Demonstration (RAD). If this occurs the NSBHA plans to demolish their public housing units and reconstruct under a different funding scheme. The NSBHA secured a competitive award of 25 Mainstream vouchers from HUD this year. These vouchers will serve adult disabled households ranging in age from 18-61. If successful these vouchers can be renewed annually.

The Ormond Beach Housing Authority (OBHA) has 41 units of public housing. During this program year, Volusia CDBG funds from FY 2016/17 completed the construction of a safe, ADA compliant sidewalk near the same public housing units.

ACTIONS TAKEN TO ENCOURAGE PUBLIC HOUSING RESIDENTS TO BECOME MORE INVOLVED IN MANAGEMENT AND PARTICIPATE IN HOMEOWNERSHIP

The Deland Housing Authority involves residents of public housing in management by having a HCV participant on the DHA board of directors. Financial and homeownership counseling is provided to public housing residents, and HCV participants on a voluntary basis.
The New Smyrna Beach Housing Authority has an elected resident council that acts as the voice of the public housing residents. Staff meets with them quarterly to obtain their input on management objectives for the housing authority. The NSBHA also has a Resident Advisory Board that helps with the development of the 5-year action plan and the submission of the Annual Plan. Residents that are determined to have the appropriate income level are referred to Habitat for Humanity for homeownership potential.

The Ormond Beach Housing Authority encourages its public housing residents to sign up for the Family Self Sufficiency program. At the OBHA annual meeting the residents are encouraged to organize a tenant association for their respective communities.

The Volusia County HCV program held four workshops for potential voucher holders and voucher holders that are ready to lease during the program year, and one workshop for new and existing HCV landlords.

**ACTIONS TAKEN TO PROVIDE ASSISTANCE TO TROUBLED PHAS**

None of the public housing agencies (PHA) within the Volusia County CDBG entitlement area are designated as troubled PHAs by HUD. Therefore, no actions were taken to provide assistance in this regard.
In connection with the requirements of the State Housing Initiatives Partnership (SHIP) program, Volusia County has formed the Affordable Housing Advisory Committee (AHAC). The primary goals of the AHAC are to review the established policies and procedures, ordinances, land development regulations and adopted local government comprehensive plan, and recommend specific actions or initiatives to encourage or facilitate affordable housing while protecting the ability of the property to appreciate in value. The AHAC meets every three years, and was reconstituted during this program year. The Community Assistance Division in cooperation with the county’s Growth and Resource Management Department is undertaking quarterly reviews of actions that the County is taking to determine the potential to impact the cost of housing. During this year, the County also amended the HOME developer agreements with two of the Habitat for Humanity affiliates to provide reimbursement for a portion of the impact fee assessed by the County and cities. The County already provides funds to cover the cost of one impact fee for affordable housing constructed in each of the four quadrants of the County. Additionally, the County government is involved in a process of soliciting public comments in its review of its transportation impact fee schedule for residential and commercial development.

The primary obstacle to meeting the needs of underserved population during the fiscal year was the availability of funds. Resources available to the public and private agencies who serve low- and moderate-income residents continue to be reduced. A decrease in overall funding, at all levels of government, prevents public agencies from being able to provide funding increases to non-profit organizations whose resources have been stretched by an increased demand in services.

The homeless population is an underserved population which was served through homeless facility operating funds with CDBG and rapid re-housing with ESF funds. Volusia County is investing funds in to this population through a number of agencies and facilities as explained in CR-25.
The county has also recognized that mobile or manufactured homeowner’s in need are underserved. Plans are in place to address this need and assist residents utilizing FY 2017/18 HOME funds and CDBG-DR funds. The county has proposed a program that would provide mobile home replacement for income-qualified homeowners with manufactured or mobile homes built prior to 1994 that were damaged during Hurricane Matthew. The program will assist those with homes on owned lots, but also contains a strategy to assist those residing on rented lots. Mobile homeowners on rented lots is a population that is difficult to help with other funding sources, especially if the home was built prior to 1994. The two manufactured home strategies along with a single-family rehabilitation strategy will help approximately 45 households countywide that are in need over a two-year period. 3.4 million dollars in CDBG-DR funds have been requested from the Department of Economic Opportunity to implement the proposed program.

An additional area of underserved need where supplemental funding was provided with CDBG funds was public services. An activity was completed during the fiscal year serving residents in a low-income target area, however CDBG funds are not always the viable source to fund public services due to spending caps and regulations. Volusia County uses general revenue funds to fund various services for the underserved population of children and many others in the community through the Children and Families Advisory Board (CFAB) program. Funding for this program was allocated based upon priority needs categories identified. Services are provided in the following categories:

- Services for persons with disabilities;
- Infant and maternal health and early childhood development to increase the availability of affordable child care and prenatal support to pregnant women;
- Seniors, including basic services such as food, care services, transportation and case management to enable seniors to continue to live independently;
- School age children including after school programs, summer care, and academic enrichment;
- Adolescents to provide opportunities for job training and enhanced vocational opportunities, leadership, and mentoring;
- Family based intervention for family violence to provide prevention education, mental health counseling, and in-home prevention and intervention;
- Basic needs, to provide emergency assistance and prevent homelessness; and
- Staff development and case management.

**ACTIONS TAKEN TO REDUCE LEAD-BASED PAINT HAZARDS. 91.220(K); 91.320(J)**

The County of Volusia is committed to testing for, abating or stabilizing lead-based paint in each housing unit that was originally placed into service prior to January 1, 1978 that is assisted with federal or SHIP grant funds through any of the housing programs implemented directly by the Community Assistance...
Division, as well as those implemented through developers or community housing development organizations (CHDOs). During this program year, three homes identified as having lead hazards had the lead abated as part of the rehabilitation process.

The following specific actions summarized below are currently being implemented to reduce lead-based paint hazards in Volusia County's housing stock.

If a rehabilitated home was originally placed into service prior to January 1, 1978, rehabilitation must comply with HUD lead-based paint rules (24 CFR Part 35 and 24 CFR Section 570.608). A lead-based paint risk inspection and assessment for lead based paint hazards is conducted by the County through the use of professional consultants procured for this purpose. Additionally, staff performs visual assessments for deteriorated paint surfaces in all residential units, regardless of year of construction.

The County uses professional consultants and demolition contractors to provide lead-based paint hazard screening and inspections, scope of work for abatement, demolition and clearance activities and consultation. The County requires the abatement work to be completed by a contractor that has a lead-based paint abatement certification. The lead-based paint hazards will be addressed in all applicable housing activities that require testing and/or abatement, and will include but not limited to performing the following:

- visual assessments for deteriorated paint surfaces in all residential units, regardless of year construction;
- risk assessments on single family and multifamily dwelling units to determine the existence, nature, severity and location of lead-based paint hazards;
- paint testing and lead or hazard screening, by testing on a limited number of surfaces in the housing unit, when indicated based on the risk assessment;
- a scope of work for abatement provided by the lead-based paint consultant, when lead-based paint has been found, the County of Volusia requires the abatement work to be completed by a contractor that has a lead-based paint abatement certification;
- instructing rehabilitation contractors to work with lead safely in accordance with HUD and/or EPA standards; and
- ensuring that CDBG subrecipients that undertake demolition projects comply with lead-based paint hazard assessments, abatement and clearance.

**ACTIONS TAKEN TO REDUCE THE NUMBER OF POVERTY-LEVEL FAMILIES. 91.220(K); 91.320(J)**

The County of Volusia Community Assistance Division actively pursues programs to reduce poverty for residents through CSBG and HCV funded Family Self-Sufficiency programs. The goal of tenant based rental assistance and rapid re-housing is to have the client be self-sufficient by the end of the program, generally...
assistance is paid at a decreasing rate and other services or case management is offered to assist the
client. Community Assistance is able to refer residents to Mid-Florida Housing Partnership, Inc. credit
counseling clinic to help them not only prepare to own a home, but to develop a financial plan. All of these
programs, along with public services offered, seek to reduce poverty.

**ACTIONS TAKEN TO DEVELOP INSTITUTIONAL STRUCTURE. 91.220(K); 91.320(J)**

Volusia County Community Assistance Division has continued to partner with other governmental
agencies, non-profit organizations, private enterprises and individuals to provide opportunities for
residents; specifically targeting low/mod-income residents. Partnership efforts include working with
representatives of various service organizations, including One Stop Career Center for job referral and
Department of Children and Families for food stamp applications, to assist households and inform
residents of the variety of agencies available to serve their needs. The number of partnering agencies is
numerous, additional information can be found throughout the CAPER; including, previous sections on
leveraging, resources available, reducing the number of poverty level families, and the following section
on coordination between public and private housing and social service agencies.

**ACTIONS TAKEN TO ENHANCE COORDINATION BETWEEN PUBLIC AND PRIVATE HOUSING AND
SOCIAL SERVICE AGENCIES. 91.220(K); 91.320(J)**

To enhance coordination between public and private housing and social services agencies, the County,
through its Community Assistance Division, undertook and participated in the following actions during
this past year:

**Volusia County Affordable Housing Partners (AHP):** The Community Assistance Division has a partnership
with not-for-profit and for-profit affordable housing organizations and companies, including Mid-Florida
Housing Partnership, Habitat for Humanity affiliates (Greater Volusia, Southeast Volusia and West
Volusia), other private lenders, banks and real estate professionals that provide residential mortgages
throughout the county. The AHPs help very-low, low- and moderate-income individuals and
households apply for homebuyer assistance loans awarded through Volusia County.

**The Children and Families Advisory Board:** The Children and Families Advisory Board (CFAB) was
established to assess and evaluate children and family priority needs, develop strategies to meet those
needs, and make funding recommendations to the county council to allocate the county general revenue
funds budgeted for these needs. The Community Assistance Division provided staff support to this board,
and coordinates with the board to ensure that information, data and funding opportunities available
through the Annual Plan is shared with the CFAB and agencies. CFAB funding helped support programs agency programs to move households from transitional to permanent housing; provide accessibility features for seniors living in rental housing; to support essential services to prevent homelessness, and for case management services for disabled persons.

The Volusia/Flagler County Coalition for the Homeless (VFCCH): The County of Volusia and The Volusia/Flagler County Coalition for the Homeless have created a partnership to enhance coordination of homeless services countywide. The Coalition holds the central leadership position with all agencies offering homeless services and coordinates the Volusia/Flagler County Continuum of Care. The county advises and offers funding opportunities for these organizations. As the lead agency in the Continuum of Care, VFCCH staff collaborated with Volusia County in the identification of the activity to be funded with the Emergency Solutions Grant.

One Voice for Volusia: The County continued to provide financial support to One Voice for Volusia through the use of County general revenue funds. One Voice for Volusia is a coalition that connects non-profit, government and community-based organizations along with local businesses to promote system and community improvements for the benefit of youth and families in the county. The Community Assistance Division also coordinated with One Voice to ensure that information and data gathered by One Voice addresses identified priority needs, as possible.

United Way/211: The County provided financial support to United Way to operate the "First Call for Help/211" telephone system that provides 24 hour/7 days a week referral and information services to link persons to housing, social services, medical services, food, transportation, and other essential needs of daily living.

Supportive Housing Steering Committee: A sub-committee of the CoH was formed this year. The focus of the committee is to raise awareness of the community’s needs for affordable and attainable housing. The committee will also be seeking to secure seed money in order to support applications for financing to construct one or more permanent supportive housing projects in Volusia and/or Flagler Counties.

IDENTIFY ACTIONS TAKEN TO OVERCOME THE EFFECTS OF ANY IMPEDIMENTS IDENTIFIED IN THE JURISDICTIONS ANALYSIS OF IMPEDIMENTS TO FAIR HOUSING CHOICE. 91.520(A)

Volusia County Community Assistance Division undertook the planning and research necessary to complete its Analysis of Impediments in FY 2014/15. The Final Report of the AI was reviewed and approved by the Volusia County Council on October 15, 2015. The County Council also adopted an AI Plan of Action.
All CDBG subrecipients are required to not only implement CDBG projects in a manner to affirmatively further fair housing, but also to continuously inform residents or clients about fair housing. Subrecipients report no less than quarterly on current efforts to inform the public. Fair housing pamphlets and posters were distributed at many city halls, events, community centers and city websites.

Volusia County directly expended state grant funds from State Housing Initiatives Partnership (SHIP) program, through contracts with Mid-Florida Housing Partnership, Inc. and University of Florida-Extension Services to conduct homebuyer and credit counseling classes which includes fair housing and fair credit related activities in FY 2017/18. The agencies conducted a total of 36 homebuyer education and credit counseling classes. This included three classes offered in Spanish-language to better outreach to the Hispanic population, and one agency regularly conducted credit counseling classes at the Spring Hill Community Center which is located in a historically African-American community, and a local CDBG target area. The table below summarizes these activities, including the direct expenditures, as well as the estimated number of people attending these fair housing events.

Table 15 – Fair Housing Activities
DESCRIBE THE STANDARDS AND PROCEDURES USED TO MONITOR ACTIVITIES CARRIED OUT IN FURTHERANCE OF THE PLAN AND USED TO ENSURE LONG-TERM COMPLIANCE WITH REQUIREMENTS OF THE PROGRAMS INVOLVED, INCLUDING MINORITY BUSINESS OUTREACH AND THE COMPREHENSIVE PLANNING REQUIREMENTS

Volusia County Community Assistance ensures compliance with program and comprehensive planning requirements through diligent monitoring of all activities implemented by participating municipalities. During the planning process, Community Assistance reviews all activities proposed to be funded to ensure conformity to meeting identified priorities in the Consolidated Plan and regulatory eligibility.

CDBG Desk monitoring is utilized monthly to verify compliance with specific program requirements. Monthly monitoring also provides data needed to track timeliness of expenditures compliance utilizing a spreadsheet. One of the strategies used during the fiscal year to encourage long-term compliance was CDBG subrecipient questionnaires being sent to all jurisdictions that participate in the Volusia County CDBG program. The surveys addressed areas of concern involving both the subrecipients and the grantee, the short and long-term needs of the area, community development, community involvement, timeliness, procurement, and technical assistance.

Annual CDBG monitorings relating to activities which were open during the 2017/18 program year were conducted during June of 2018. Over the last couple of years staff has taken a more thorough approach by performing on-site monitorings of every participating CDBG jurisdictions implementing activities, not only those activities identified as medium or high-risk.

Community Assistance conducted its annual monitoring of non-profit and for-profit housing providers to ensure compliance with long-term affordability requirements for the HOME-assisted rental units funded in the current and previous years. The list of HOME-assisted units that were inspected is contained in CR-50. The HOME MBE/WBE report is provided in section CR-15. There were no rehabilitation projects awarded that were completed this year with HOME funds, and therefore the report shows no activity.

Community Assistance also reviewed the reports available through the online IDIS system, and other HUD reporting mechanisms (HOME Dashboard reports), to ensure compliance with HOME commitment and expenditure deadlines, and to review how our program compares with national benchmarks.
CITIZEN PARTICIPATION PLAN 91.105(D); 91.115(D)

DESCRIBE THE EFFORTS TO PROVIDE CITIZENS WITH REASONABLE NOTICE AND AN OPPORTUNITY TO COMMENT ON PERFORMANCE REPORTS.

Community Assistance achieves compliance with public participation requirements through implementation of the Citizen Participation Plan, which was updated and adopted by Volusia County Council on May 6, 2010. Volusia County Community Assistance has taken several measures to ensure that performance reports are available and advertised to citizens to review and comment on.

On November 18th a newspaper advertisement announced the availability of the Draft CAPER on the Volusia County website at www.volusia.org/reports, as well as hard copies at three offices throughout the county. The same advertisement announced a public meeting to be held on December 3, 2018 to discuss the draft CAPER. Citizens were given ample notice of the meeting and more than the minimum of 15 days to comment on the reports. All notices and meeting advertisements give instructions to the public that wish to have meeting materials in a language other than English or require any special accommodations.

Two members of the public attended the meeting and learned about the consolidated plan process, overall programs, goals, accomplishments, and expenditures in the prior year. The public in attendance actively participated in the meeting by asking programmatic questions, but no comments were received in regards to the published Draft CAPER and no changes were made.
SPECIFY THE NATURE OF, AND REASONS FOR, ANY CHANGES IN THE JURISDICTION’S PROGRAM OBJECTIVES AND INDICATIONS OF HOW THE JURISDICTION WOULD CHANGE ITS PROGRAMS AS A RESULT OF ITS EXPERIENCES.

Volusia County continues to have positive experiences in implementing activities, partnering with participating jurisdictions, and meeting national objectives. The biggest struggle in recent years facing Volusia County and participating jurisdictions is the decreased funding available, while community needs have increased.

A significant change to the CDBG allocation methodology was made beginning in the 2015/16 program year. All participating municipalities were previously receiving an assigned percentage of the total allocation. Percentages had been determined using 1990 census poverty data and were established by County Council in 1995. Allocations had been adjusted as needed when cities joined or left the program. Low/Moderate Income Summary Data (LMISD) released in July of 2014 gave Volusia County an opportunity to look into altering allocation methods. This CAPER is the third report after revising the allocation methodology to ensure it was more in line with the allocation formula utilized by HUD. The new method of allocating the limited funds available has allowed for more substantial activities to take place, even in communities with lower populations, while aligning allocations with the most current population, overcrowding, and poverty data. A competitive application process is now used annually for jurisdictions that have a low calculated share of allocated funds, allowing them to compete for larger sums instead. The new method has been successful, there are no plans to change this again based on current circumstances.

Throughout the 2017/18 fiscal year changes were made to the consolidated plan as necessary. Each time a substantial amendment occurred the public was given the opportunity to comment on the proposed changes, as dictated by the Citizen’s Participation Plan. No comments were received from citizens related to amendments.

| Does this Jurisdiction have any open Brownfields Economic Development Initiative (BEDI) grants? | No |

County of Volusia FY 2017/18 CAPER
INCLUDE THE RESULTS OF ON-SITE INSPECTIONS OF AFFORDABLE RENTAL HOUSING ASSISTED UNDER THE PROGRAM TO DETERMINE COMPLIANCE WITH HOUSING CODES AND OTHER APPLICABLE REGULATIONS

Please list those projects that should have been inspected on-site this program year based upon the schedule in §92.504(d). Indicate which of these were inspected and a summary of issues that were detected during the inspection. For those that were not inspected, please indicate the reason and how you will remedy the situation.

PROVIDE AN ASSESSMENT OF THE JURISDICTION’S AFFIRMATIVE MARKETING ACTIONS FOR HOME UNITS. 92.351(B)

Volusia County and its partners undertake affirmative marketing actions for its HOME units. Marketing was accomplished through workshops, press releases, a network of affordable housing partners, and other informal efforts to promote knowledge of and involvement with affordable housing opportunities. The annual HOME monitoring of the community housing development organizations and rental housing developers that received HOME funding includes a review of their affirmative marketing plans and actions to accomplish.
REFER TO IDIS REPORTS TO DESCRIBE THE AMOUNT AND USE OF PROGRAM INCOME FOR PROJECTS, INCLUDING THE NUMBER OF PROJECTS AND OWNER AND TENANT CHARACTERISTICS

According to IDIS PR09 report, Volusia County receipted $178,480.16 of program income and homebuyer assistance recapture and expended $13,847.42 of current year program income in this program year (October 1, 2017 through September 30, 2018). Additionally, Volusia County expended $29,628.00 of program income receipted in the prior year. The table below provides further detail of the activities that used program income.

DESCRIBE OTHER ACTIONS TAKEN TO FOSTER AND MAINTAIN AFFORDABLE HOUSING. 91.220(K)

Volusia County continues to foster and maintain affordable housing through its use of HOME funds, which have been supplemented by even larger allocations of SHIP funds for the past two years. Actions taken to foster and maintain affordable housing during this program year include the following:

- Issuance of a request for proposals to provide an incentive loan for projects submitting competitive applications in the state’s low income housing tax credit (LIHTC) RFA application process. Five projects were preliminarily selected to receive a loan from Volusia County using SHIP funds; however none of the Volusia County funded projects were selected by Florida Housing Finance Corporation to commence the credit underwriting process. The Pines Apartments, an 88 unit multi-family LIHTC rental development for families located in DeLand is under construction and should be completed in February, 2019. The Banyan Cove Apartments, a 100 unit multi-family LIHTC rental development for seniors located in DeLand is under construction and should be completed in July, 2019.

- Expand the homeowner development project to three local Habitat for Humanity affiliates which provides HOME funds to leverage the development of affordable homebuyer housing units.

9. PROJECT OUTCOMES DATA MEASURED UNDER THE PERFORMANCE STANDARDS DEVELOPED IN CONSULTATION WITH THE COC(S)

Volusia County, in consultation with the CoH, identified rapid re-housing and homeless prevention services as a priority. Rapid re-housing assists extremely low-income households who are homeless move as quickly as possible into permanent housing and homeless prevention assists extremely low-income households who are at imminent risk of becoming homeless achieve stability through a combination of rental assistance and supportive services. During FY 2017/18, Volusia County, through its rapid re-housing program provided rental and utility assistance to 25 households and to 21 families through its homeless prevention program. Clients served through both programs include the disabled, victims of domestic violence and the elderly. Both programs received referrals from the Community Services Human Services Activity, local non-profit organizations and the Volusia/Flagler County Coalition for the Homeless. Priority was given to families with children facing first-time homelessness and the program's written standards, as developed in consultation with community homeless service providers.

IDIS REPORTS

The County of Volusia has access to a number of reports that summarize the current state of CDBG, HOME, and ESG in the Integrated Disbursement and Information System (IDIS). One of these reports, the Con Plan Goals and Accomplishments Report, can be found in the Goals and Outcomes section of the CAPER. PR-26, CDBG Financial Summary Report, is included with this report as Appendix A. The PR-26 report illustrates a number of guidelines that are being strictly adhered to by the Volusia County CDBG program; such as, public services cap, administration cap, and benefit to LMI persons. If there are additional reports or information that Volusia County residents desire please use the contact information on the front cover of the CAPER. Community Assistance will attempt to accommodate those requests in a timely manner.

ESG REPORTING

A new method of reporting persons assisted with ESG funds went into effect on October 1, 2017. Volusia County is fully complying with this new reporting method, which requires ESG reports to be submitted through the Sage HMIS Reporting Repository. Previously, grantees reported the number of persons assisted in a number of categories within the CAPER, in section CR-65 – PERSONS ASSISTED. While this section does still exist in the online system, IDIS, it is now left blank. CR-65 has been removed from this published version of the CAPER to coincide with the CAPER submitted to HUD in IDIS. As directed, data has been submitted to HUD through the Sage HMIS Reporting Repository. The Sage report is included with this report as Appendix B.

CONCLUSION

The information presented in the Consolidated Annual Performance and Evaluation Report (CAPER) will be used as a base for establishing future goals, to evaluate performance, and to address any areas of concern or lacking. Community participation is a pillar in the programs reviewed herein. The residents of Volusia County are encouraged to examine, evaluate, and comment on the past performance as well as the direction of the programs. Community meetings are held throughout the year to facilitate this type of feedback. The County of Volusia Community Assistance Division is proud to be a part of the activities presented and see the value of these accomplishments through the outcomes in our community every day.
