

COUNTY OF VOLUSIA, FLORIDA

ANNUAL REPORT ON COUNTY DEBT

**FISCAL YEAR ENDED
SEPTEMBER 30, 2016**

Prepared By:

**DONNA de PEYSTER, CPA
DEPUTY COUNTY MANAGER /
CHIEF FINANCIAL OFFICER**

**RYAN OSSOWSKI, CPA
ACCOUNTING DIRECTOR**

ACKNOWLEDGEMENTS

The compilation of this document is attributed to the combined efforts of several individuals deserving of special recognition. The cooperation, contributions and expertise provided by each one are greatly appreciated.

The Accounting Division staff is commended for their expertise and efforts put forth in preparation of the Comprehensive Annual Financial Report (CAFR). The CAFR is the foundation for information contained in this report.

Accounting Division

Lynne Urice, CGFO, Assistant Accounting Director
Shirley Liu, CPA, Senior Accountant
Jennifer Madewell, Senior Accountant
Svetlana Ries, Accountant Trainee
Terri Ruegger, CGFO, Fiscal Resource Manager
Myriam Lemay, CTP, Activity Project Manager
Tiffany Alvarez, Administrative Coordinator

Our Financial Advisors serve as consultants and advisors in many areas of financial management. The depth of experience and breadth of knowledge has served the County well in refinancing of bonds issues and data analysis for proposed offerings of debt.

Public Financial Management

Jay Glover, Managing Director

Additional Acknowledgements:

Rhonda Orr, CGFO, Department Director of Business Services
Tammy Bong, Department Director of Budget and Administrative Services
Roger Wittenberg, Fiscal Resource Manager, Community Assistance
Robert Ehrhardt, Business Manager, Economic Development

COUNTY OF VOLUSIA, FLORIDA ANNUAL REPORT ON COUNTY DEBT EXECUTIVE SUMMARY 2016

This document provides a detailed discussion of outstanding debt and debt service obligations for the County of Volusia, Florida (County). The ensuing report details information relating to the extent, nature and purpose of the County's indebtedness. It is a comprehensive, yet consolidated analysis; one which provides information that can assist in the evaluation, review and planning of future financings, while taking into consideration the impact of such financings on the County's financial health. Data contained in the audited Comprehensive Annual Financial Report for fiscal year ended September 30, 2016 provides its foundation.

As of September 30, 2016, total County outstanding indebtedness was \$180,872,575 and included bonded debt of \$138,113,689 and notes and loans payable of \$42,758,886. The reduction in outstanding County debt over last fiscal year was due primarily to scheduled principal retirements of \$40,312,314 offset by \$16,000,000 in new debt issuances.

Financial Management Strategies

The County takes a planned approach to the management of debt, funding from internally generated capital where appropriate, and financing when appropriate. Conservative financial strategies and management practices help to minimize exposure to sudden economic shocks or unanticipated expenditures. Quarterly monitoring and evaluation of factors that can affect the financial condition of the County help identify any emerging financial concerns. The practice of multi-year forecasting enables management to take corrective action long before budgetary gaps develop into a crisis. These practices have served the County well during this difficult economic climate. The County has managed to maintain fiscal sustainability and a fiscally resilient government.

The Government Finance Officer's Association and other national associations have published best practices promoting efficiency in government and solvency in public finance. One best practice focuses on the appropriate level of unrestricted fund balance in the General Fund. Credit rating agencies monitor levels of fund balance and unrestricted fund balance to evaluate creditworthiness. In keeping with this best practice, in fiscal year 1999-2000, the County Council adopted a minimum goal of 5% working toward a goal of 10% of current revenues to fund this reserve in ad valorem tax funds. Funding of the reserve accounts provides flexibility in responding to economic downturns or sudden changes in revenue. The importance of these reserves became very evident in 2004 when the County experienced the financial burden of four hurricanes. For the 2017 fiscal year, approximately 10% has been reserved in the General Fund and 5.1% in the Municipal Service District Fund. Other emergency reserves include the Library at 7.2%; Ponce De Leon Authority at 10%; Mosquito Control at 10%; and Fire Services at 10%.

During the economic downturn, measures have been taken to "tighten the belt" by eliminating positions through attrition and becoming more efficient in operations. Management's vigilant review of changes in the economy along with monitoring revenue and expenditure trends has allowed for operational changes that have helped stabilize operations and weather the economic downturn. The County reacted early and has maintained the course, keeping an eye on the fiscal health of the organization making tough decisions when needed. The organization continues to provide citizens with the services they depend upon; however, few new or expanded programs or capital projects are budgeted.

Our organization is leaner than eleven years ago, due to the willingness of the employees, from top to bottom, to embrace change and respond positively to the current realities. A reduction in personnel services expenditures reflects various changes ranging from retirements, reduced overtime, filling positions at lower rates, and not funding positions when possible. In addition, to ensure the County does not become reliant on unreserved and undesignated fund balance to fund on-going operating costs, one-time revenues are allocated for one-time capital purchases, to pay off debt or to increase operating reserves.

Management continues to be proactive in identifying impacts to the budget while anticipating needed infrastructure requirements. The legislative sessions are closely monitored looking for changes that will impact the County's budget and/or operations. Any shift in unfunded mandates will not be able to be absorbed without affecting service levels or requiring offsetting revenue streams. The Capital Improvement Plan prioritizes current and future infrastructure requirements to fit within the anticipated level of financial resources. The report develops a plan to fund those requirements over a five-year period and is reviewed and updated annually. It serves as a planning and management tool, rather than a wish list of projects that cannot be fully implemented.

Notables

Bonds Payable and Notes Payable

On October 2, 2015, the County closed a loan agreement of \$9.0 million to fund its obligation for the Williamson Boulevard reconstruction and extension project. The financing offered by Pinnacle Public Finance is comprised of a Capital Improvement Revenue Note, Series 2015, carrying a fixed rate of 2.17% for the term of ten years.

On September 28, 2016, the County issued Capital Improvement Revenue Note, Series 2016, for \$15 million to fund certain infrastructure costs for the One Daytona Community Development District mixed-use project. The financing offered by Ameris Bank is carrying a fixed rate of 1.85% for the term of ten years. As of September 30, 2016, \$7 million was received, while the remaining of \$8 million proceeds were drawn down in the subsequent fiscal year.

Also of note is that the final payment was made on the portion of the Limited Tax General Obligation Bond, Series 2005 that remained after last year's refunding.

Commuter Rail

The County has been evaluating the possibility of rail service linking Volusia County and the Orlando metropolitan area since 1997. On July 31, 2007, the County joined Orange, Osceola, and Seminole counties, and the City of Orlando to create the Central Florida Commuter Rail Commission (Commission). The purpose of the Commission is to provide for the operation and creation of a funding plan for a light rail system that will serve the central Florida area. The four counties and city are the local governing partners that each contributes one member to form the governing board of the Commission. The Commission entered into two agreements with the Florida Department of Transportation who will provide the funds for a 50 percent match of federal funds for the acquisition and construction of a commuter rail system. As a Commission partner, the County is responsible for providing a portion of the capital costs. Volusia County has pledged \$26.5 million, which will pay for two west side train stations, train sets, and track improvements.

On February 27, 2007, the County Council approved using State Infrastructure Bank (SIB) loans to cover the County's share of the local capital costs. The County received approval for two State Infrastructure Bank (SIB) loans totaling \$12.5 million for Phase 1 construction. Draws for Phase I construction began in February 2011 and totaled \$5.6 million by fiscal year end. No additional draws or loans were made in the subsequent years. On October 1, 2015, the final payment of principal and interest on the \$5.6 million draw was made.

On January 8, 2015, the County Council authorized the final SIB loan in the amount of \$12,402,000 to fund the commuter rail Phase II costs within the County. However, due to the fact that the FDOT has not been able to secure the 50% share of project costs from Federal Government, the loan has not executed by the State.

Economic Outlook

In developing the fiscal year 2017 budget, the County Council considered many factors including the following major components:

- Economic indicators, such as retail sales and housing starts, continue to improve and the unemployment rate continues to drop. Consumer confidence is strengthening as demonstrated by the growth of 5.5% in sales tax, 9.5% in tourist and convention development taxes, and 6.9% in gas taxes.
- General fund property values increased 6.8% to \$28.9 billion with 5.6% of this increase from reassessments and 1.2% from new construction. The values are however still below fiscal year 2006 “pre-bubble” levels.
- Eight of the taxing funds’ millage rates remain flat. In order to provide a reduction in taxes, the general fund’s millage rate was decreased by 0.2189 mills.
- New and continued capital projects planned for the fiscal year include the Public Works Service Center, Elections Warehouse, Sheriff’s Office Evidence and Forensic Laboratory, Off-Beach Parking Development and Beach Boardwalk Development. Continued funding is provided for the Trail Program and maintaining the Ocean Center building.
- The personnel services portion of the budget reflects a pay adjustment of 3.0% for all eligible County employees and state-mandated increases in the Florida Retirement System (FRS) rates.

Subsequent Events

During the fiscal year ended 2016, the County issued Capital Improvement Revenue Note, Series 2016, in the amount of \$15,000,000 to fund certain infrastructure costs for the One Daytona Community Development District mixed-use project. The terms of the note allow the County to draw the loan proceeds as needed during the initial 24 months of the loan, rather than drawing all proceeds at loan origination. The County made an initial draw of \$7,000,000 at issuance. The remaining \$8,000,000 in proceeds were drawn on March 2, 2017, allowing the County to save \$61,667 in interest costs on the \$8,000,000 in principal over the 5 months between the initial draw and final draw.

Closing Comments

Management continues to monitor changes in revenues and their potential impact on bond covenants and debt service requirements. Mini-budget workshops are convened throughout the year at County council meetings to allow the council to focus on specific areas of the budget and make decisions regarding potential service level modification. These sessions facilitate review of the department operating plans and offer input and guidance to the manager for service level changes and preparation of next year’s budget.

The County’s overall debt profile is characterized by good debt service coverage from its pledged revenues and is in conformance with all compliance covenants. The debt burden is low, and the County has significant debt capacity remaining. All proposed financings are analyzed for their impact on the County’s financial picture.

An objective measure of the County’s fiscal performance is evidenced by the latest financial analysis and review by Fitch Rating Agency. Rating agencies evaluate default risk over the life of a debt issue, incorporating an assessment of all future events to the extent they are known or considered likely. They routinely review and evaluate current financial and economic conditions and are particularly interested in focusing on the scenarios that could result in a rating change over a one- to two-year period.

In February 2017, Fitch Ratings began a routine surveillance of certain county debt that had been rated by their agency. The results of that review were published on March 23, 2017, and were as follows:

- Fitch upgraded the underlying bond rating for the County of Volusia, Florida Tourist Development Tax Revenue Bonds, Series 2004 from “A” to “AA-”
- Fitch has affirmed the county’s Issuer Default Rating (IDR) at “AA”

The rating outlook was stable for all bonds.

Of particular note are several assertions in their latest report:

- Fitch expects Volusia County to maintain strong financial resilience throughout the economic cycle. The county has built a high reserve cushion through a combination of expenditure reductions and conservative budget practices.
- The county’s strong budget controls and consistently solid reserve funding provide for a superior level of financial resilience.
- A rebound in the economy has provided for new revenues and, combined with management’s careful spending, reserves have been rebuilt soundly above policy levels.
- The county’s long-term debt and unfunded pension liabilities are low and fixed costs for debt service, pensions and OPEB are very moderate.
- Debt service costs are not expected to grow notably as the county’s future borrowing plans are moderate and principal amortization rates of governmental debt are high at 75% over ten years.

These comments are a reflection of fiscal policy established by the County Council and implemented by county management and includes sound management practices, continued vigilance in long range monitoring of revenue and expense trends, maintaining strong reserve balances, prudent fiscal practices and a conservative approach to debt management.

While the County continues to face great challenges, strong financial management, manageable debt levels, and financial flexibility, are all indicators of good fiscal health.

August 2017

TYPES OF DEBT ISSUED BY VOLUSIA COUNTY

Bonded Debt

Bonded debt requires the local government to pledge certain revenues for repayment of the debt. Local government bonded debt can be divided into three different types:

- **General obligation (“G.O.”) bonds** are backed by a pledge of the full faith and credit of the issuing entity. The full faith and credit is a pledge of the general taxing powers for the payment of the debt obligation. Because of the impact on property owners, the issuance of general obligation debt in Florida requires the consent of the voters through a referendum.
- **Non-self-supporting revenue bonds** are bonded debt for which local government has pledged its general revenues. These revenues may include either ad valorem (property tax) and/or non-ad valorem (building and zoning permit fees, franchise fees, gas taxes, sales tax, etc.)
- **Self-supporting revenue bonds** are bonded debt that the local government has pledged to repay with revenues generated from operations of a specific system. Examples would include a water bond that is repaid from water utility income, and special assessment bonds that are repaid from fees levied on properties within a special assessment district.

Other Financing Instruments

In addition to bonded debt, local governments can utilize notes and loans. This type of financing can offer lower interest rates, flexible repayment terms, and minimal issuance costs. Notes and loans can be divided into two different types:

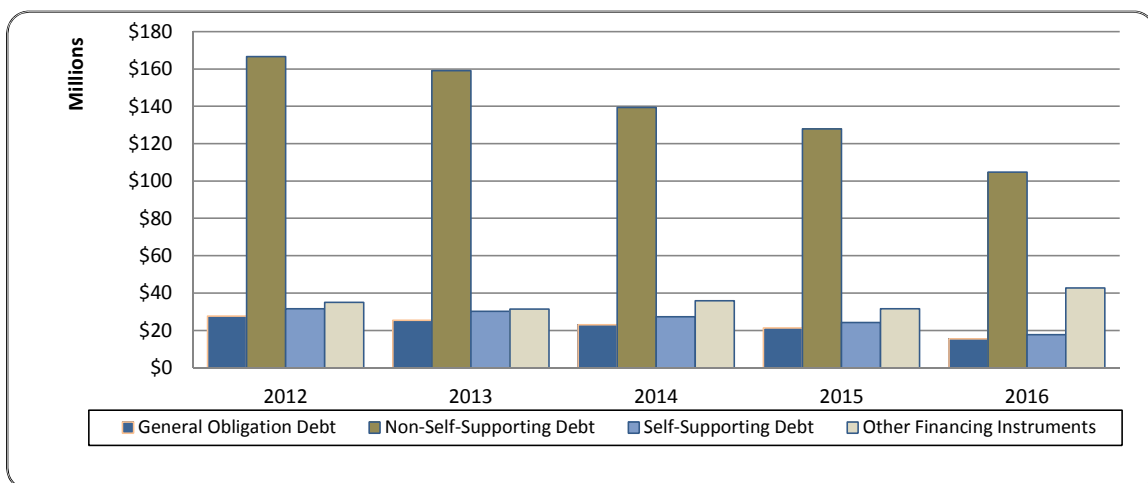

- **Revenue notes** are debt incurred by local governments not secured by a pledge of revenues, but rather a covenant to budget appropriate for repayment of the debt. Revenue notes are entered into between a local government and a private party, usually an issuing bank.
- **Government loan programs** are sometimes available to local governments from the State government for statutorily limited purposes. Often, these loans can offer interest rates and repayment terms that other financing methods cannot. Examples of such programs include:
 - State Revolving Fund (SRF) loan programs, pursuant to Section 403.1835 and Section 403.8532, Florida Statutes, whereby the State makes low cost loans to local governments for the construction of drinking water systems or wastewater pollution control facilities.
 - State Infrastructure Bank (SIB) loan program, pursuant to Section 339.55, Florida Statutes, whereby the State makes low cost loans to local governments for the construction of transportation infrastructure.

BOND RATINGS OVERVIEW

General Information

Most publicly sold bond issues are assigned a rating by a rating agency, such as Fitch Ratings, Moody's Investors Service, and/or Standard & Poor's. The rating is an extremely important factor in determining an issues' marketability and the interest rate the County will pay. Ratings are relied upon by investors in making investment decisions and by underwriters in determining whether to underwrite a particular debt issuance. Sometimes, a bond rating will be improved by an insurance policy guaranteeing repayment; such a rating is said to be credit enhanced. When credit enhancement is used, it is often desirable to also know the rating that would occur without the bond insurance in place, which called the underlying rating. The underlying rating is presented by the County to show the creditworthiness of the County's debt on its own merit.

In order for a bond issue to be rated, the County must contract with a rating agency and pay a fee. The County provides the rating agency with operational and financial information. The agency rates the bond issue based on a detailed analysis of this information. The agencies also review ratings on a regular basis to determine if the risk of default has changed over time. If they feel that the level of risk has changed, the agencies may downgrade or upgrade a rating. This review is often referred to as "surveillance". The most recent surveillance for County debt was covered on the prior page of this report.

Agency Ratings

Fitch and Standard & Poor's rates bond issues from AAA to D. Bonds which are rated AAA are considered to carry the highest credit quality and have an exceptionally strong ability to pay interest and repay principal. The ratings may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Moody's rates bond issues from Aaa to C. Bonds which are rated Aaa are judged to be of the highest quality and carry the smallest degree of risk. Moody's applies numerical modifiers 1, 2, and 3 in each rating classification. The Modifier 1 indicates that the issue ranks in the higher end of the rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates that the issue ranks in the lower end of the category.

The following are the assignment approaches of the major rating services for the highest to medium grade securities.

Credit Quality	Moody's	S&P	Fitch	Rating Definitions
Highest	Aaa	AAA	AAA	Lowest Credit Risk - Extremely strong financial commitment
High	Aa1 Aa2 Aa3	AA+ AA AA-	AA+ AA AA-	Very Low Credit Risk - Very strong financial commitment
Upper-Medium	A1 A2 A3	A+ A A-	A+ A A-	Low Credit Risk - Strong financial commitment
Medium	Baa1 Baa2 Baa3	BBB+ BBB BBB-	BBB+ BBB BBB-	Moderate Credit Risk - Capacity for repayment may be weakened by adverse economic conditions or changing circumstances

COUNTY OF VOLUSIA, FLORIDA BOND RATINGS

Rating agencies evaluate default risk over the life of a debt issue, incorporating an assessment of all future events to the extent they are known or considered likely. They routinely review and evaluate current financial and economic conditions and are particularly interested in focusing on the scenarios that could result in a rating change over a one- to two-year period.

In February 2017, Fitch Ratings began a routine surveillance of certain county debt that had been rated by their agency. The results of that review were published on March 23, 2017, and were as follows:

- Fitch upgraded the underlying bond rating for the County of Volusia, Florida Tourist Development Tax Revenue Bonds, Series 2004 from “A” to “AA-”
- Fitch has affirmed the county’s Issuer Default Rating (IDR) at “AA”

The rating outlook was stable for all bonds.

Of particular note are several assertions in their latest report:

- Fitch expects Volusia County to maintain strong financial resilience throughout the economic cycle. The county has built a high reserve cushion through a combination of expenditure reductions and conservative budget practices.
- The county’s strong budget controls and consistently solid reserve funding provide for a superior level of financial resilience.
- A rebound in the economy has provided for new revenues and, combined with management’s careful spending, reserves have been rebuilt soundly above policy levels.
- The county’s long-term debt and unfunded pension liabilities are low and fixed costs for debt service, pensions and OPEB are very moderate.
- Debt service costs are not expected to grow notably as the county’s future borrowing plans are moderate and principal amortization rates of governmental debt are high at 75% over ten years.

These comments are a reflection of fiscal policy established by the County Council and implemented by county management and includes sound management practices, continued vigilance in long range monitoring of revenue and expense trends, maintaining strong reserve balances, prudent fiscal practices and a conservative approach to debt management.

**COUNTY OF VOLUSIA, FLORIDA
RESTRUCTURING OF DEBT AND REDEMPTION PROVISIONS
FISCAL YEAR ENDED SEPTEMBER 30, 2016**

Overview

There are usually three major reasons for restructuring debt: to reduce the issuer's interest costs, to restructure debt service; or to remove a burdensome or restrictive covenant imposed by the terms of the bonds being refinanced. Due to the legal, financial advisory, and issuance costs associated with the issuance of the new refunding bond, present value savings should be calculated to determine whether a refunding is financially feasible. The following is a brief discussion of restructuring methods.

- *Refunding* – A process whereby an issuer refinances an outstanding bond issue by issuing new bonds. The proceeds of the new bond issue either are used to immediately retire the outstanding obligations or are used to purchase a portfolio of U.S. Treasury securities whose cash flows are used to pay off the remaining debt service of the old, refunded bonds until they are called or mature.
 - *Current Refunding* – a refunding in which the prior, refunded bonds are called or mature within 90 days of issuance of the refunding bonds.
 - *Advance Refunding* – the prior, refunded bonds remain outstanding until maturity or their first call date. The maturity or call date may be years in the future. Governmental bonds are generally limited to one advance refunding.
 - *Forward Refunding* – the issuer may lock in existing low interest rates and refund the bonds on their first call date. Therefore, all the terms of the transaction are agreed upon today, but the transaction does not occur until the first day of the current refunding period.
- *Defeasance* – To discharge the lien of an indenture relating to a bond issue and, in the process, render inoperative restrictions under which the issuer has been obligated to comply. Ordinarily, an issuer may defease an indenture requirement by depositing with a trustee an amount sufficient fully to pay all amounts under a bond contract as they become due. When defeased, the security lien of an indenture is released, and the debt is legally satisfied even though it may not have been formally retired.

Current Fiscal Year Activity

No restructuring of debt occurred in the current fiscal year.

Available Redemption Provisions

When a debt issuance has an available redemption provision, it provides the County additional flexibility for potential restructuring of debt. The redemption provisions available to the County are shown on the following page.

COUNTY OF VOLUSIA, FLORIDA
Redemption Provisions by Fiscal Year

Issuance	Redemption Provision	Interest Rate (1)	Final Maturity Date
FY 2016-2017:

Gas Tax Refunding Revenue Bond, Series 2013	October 1, 2018 and thereafter at 100%	2.035%	10/1/2024
FY 2020-2021:			
Capital Improvement Revenue Note, Series 2015	October 1, 2020 and thereafter at 100%	2.17%	10/1/2025

(1) Interest rates for some State of Florida Revolving Fund loans are blended rates and some include Grant Allocation Assessment fees, see individual schedules for details.

COUNTY OF VOLUSIA, FLORIDA
KEY DEBT RATIOS
FISCAL YEAR ENDED SEPTEMBER 30, 2016

Management takes a planned approach to the management of the County's finances. Quarterly monitoring, annual trend analysis of the County's financial condition and multi-year forecasting help identify any emerging financial concerns. Evaluating the long-term impact of financing options also helps management make informed decisions when recommending the issuance of debt for capital spending. Maintaining strong fiscal health helps provide financial flexibility and protection from economic changes or unanticipated expenditures.

Debt ratios are among the analytical measures used by credit agencies to evaluate the financial strength of entities. Management also reviews these ratios annually to evaluate the County's debt profile. The County has maintained a relatively low amount of debt and key indicators show favorable trends as shown in the following table.

	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
General Obligation Bond Debt	\$27,750,000	\$25,430,000	\$23,025,000	\$21,295,000	\$15,510,000
General Obligation Debt Per Capita [1]	\$56	\$51	\$46	\$42	\$30
Non-Self Supporting Revenue Bond Debt	\$166,775,000	\$159,239,000	\$139,441,336	\$127,899,669	\$104,908,689
Non-Self Supporting Revenue Debt Per Capita [1]	\$335	\$319	\$277	\$251	\$203
Direct Debt [2]	\$212,331,193	\$199,140,978	\$178,669,645	\$163,008,439	\$147,191,585
Direct Debt Per Capita [1]	\$427	\$399	\$355	\$319	\$284
Direct Debt as a percent of County Personal Income [3]	1.22%	1.13%	0.97%	0.84%	0.72%

[1] Some amounts related to per capita have been restated since the prior report due to revisions in population estimates.

[2] Includes General obligation debt, Non-self supporting debt, and notes payable from governmental funds. Amount also includes issuance premiums and discounts (but not including deferred amounts on refunding or issuance costs) on these debts.

[3] Amount has been restated since the prior report due to revisions in personal income estimates.

**COUNTY OF VOLUSIA, FLORIDA
ARBITRAGE CALCULATION SCHEDULE
FISCAL YEAR ENDED SEPTEMBER 30, 2016**

Arbitrage refers to the profit earned by investing tax-exempt bond funds in higher yielding investments. Under federal arbitrage regulations, an issuer of tax-exempt bonds is allowed to earn this profit for a certain period of time during the construction period of the related project. Once this time period has expired, the profit realized on any recurring bond proceeds is subject to rebate to the federal government. These federal arbitrage regulations apply to all of the County's governmental and business-type tax exempt bonds. As of fiscal year 2016, no amounts are subject to rebate.

The following is a table of arbitrage rebate calculation due dates:

Debt Issuance	Original Amount	Dated/ Issue Date	Last Calculation Date	Next Required Calculation Date
Capital Improvement Refunding Revenue Bond, Series 2009B	\$ 5,812,000	09/10/2009	09/10/2014	10/01/2016

COUNTY OF VOLUSIA, FLORIDA
HISTORY OF TOURIST DEVELOPMENT TAX PLEDGED DEBT
FISCAL YEAR ENDED SEPTEMBER 30, 2016

Series	Issue Date	Par Amount	Interest Rates	Final Maturity	Purpose
1983*	8/1/1983	\$ 25,000,000 4,000,000	8.90% - 9.50%	2014	Finance the cost of the acquisition and construction of a Civic Center and Parking Facilities, land and other facilities related to the Civic Center, including all costs of issuance of the bonds.
1986**	10/1/1986	32,755,000	4.00% - 7.25%	2014	To advance refund the County's outstanding Tourist Development Tax Revenue Bonds, dated August 1, 1983 and the Civic Center Facilities Revenue Bonds, dated August 1, 1983
1993***	3/4/1993	33,530,000	2.50% - 5.25%	2013	To refund all of the County's outstanding Tourist Development Tax Refunding Revenue Bonds, Series 1986.
2002	10/3/2002	22,565,000	2.00%-3.50%	2013	To advance refund a portion of the outstanding Tourist Development Tax Refunding Revenue Bonds, Series 1993.
2004#	9/2/2004	55,451,336	3.00% - 5.03%	2034	To fund the expansion and renovation of the County's Ocean Center, including the addition of approximately 100,000 square feet of new exhibition space and 30,000 square feet of new meeting rooms, façade improvements and surface parking.
2014A#	4/15/2014	21,380,000	3.51%	2034	To advance refund a portion of the Tourist Development Tax Revenue Bonds, Series 2004.
2014B#	4/15/2014	25,000,000	3.51%	2034	To advance refund a portion of the Tourist Development Tax Revenue Bonds, Series 2004.

NOTES:

*The 1983 bonds are special obligations of the County payable solely from and secured by a first lien on and pledge of the Gross Operating Revenues, the Tourist Development Tax proceeds and secured by a first lien upon and pledge of the Parking Revenues and CCRF Investment Earnings, and by a lien upon and pledge of the Subordinated Tourist Development Tax Proceeds, the Subordinated Operating Revenues of the Civic Center and the City funds (via interlocal agreement - not to exceed \$3.1 million per year).

**The 1986 bonds are payable solely from and secured by a first lien on and pledge of the Tourist Development Tax, the Net Operating Earnings, and certain Investment earnings, and by a lien upon and the pledge of the City Funds pledged toward the payment of the Bonds and required to be paid to the County by the City of Daytona Beach, Florida for deposit to the Sinking Fund created in the Resolution and pursuant to the conditions and terms of the Interlocal Agreement (not to exceed \$3.1 million per year).

***The 1993 bonds are payable from and secured by a prior lien on and pledge of the Tourist Development Tax Revenues, subject to the release provisions, the City Funds required to be paid to the County by the City of Daytona Beach, Florida for deposit to the Debt Service Fund pursuant to the conditions and terms of the Interlocal Agreement and until applied in accordance with the provisions of the Resolution, all moneys, including investments thereof in certain funds and accounts.

#The 2004 bonds, the 2014A and 2014B bonds are payable from and secured by a prior lien on and pledge of the Tourist Development Tax Revenues, on a parity basis with the County's Tourist Development Tax Refunding Revenue Bonds, Series 2002.

**COUNTY OF VOLUSIA, FLORIDA
CONDUIT DEBT OBLIGATIONS
FISCAL YEAR ENDED SEPTEMBER 30, 2016**

Three entities have been established for the sole purpose of providing financial assistance to private-sector entities to acquire or construct equipment and facilities deemed to be in the public interest. The three entities and their purposes are:

- **Housing Finance Authority of Volusia County** – provide financing to alleviate the shortage of affordable rental housing and residential housing facilities for low and moderate income families and individuals, and to provide capital for investment in such housing facilities.
- **Volusia County Industrial Development Authority** – provide financing for the purpose of fostering economic development with Volusia County.
- **Volusia County Educational Facilities Authority** – provide financing for higher education projects required or useful for the instruction of students or the operation of an institution of higher education in Volusia County.

Bonds issued on behalf of the entities are not deemed to constitute a debt of the County of Volusia, the State of Florida, or any political subdivision thereof. Bonds or other debt obligations are payable solely from the revenues or other resources pledged under the terms of the debt agreements.

A summary of outstanding issues at September 30, 2016 is comprised of the following:

Entity	Number of Series Outstanding	Original Issued	Aggregate Principal Outstanding
Housing Finance Authority of Volusia County	4	\$ 31,465,000	\$ 22,795,000
Volusia County Industrial Development Authority	3	11,810,000	8,502,195
Volusia County Educational Facilities Authority	6	310,565,000	294,249,000

COUNTY OF VOLUSIA, FLORIDA DEBT MANAGEMENT POLICY

Mission Statement

To provide a comprehensive and viable debt management policy which recognizes the capital improvement needs of the County as well as the taxpayers' ability to pay while taking into account existing legal, economic, financial and debt market considerations.

General Policy Overview

The basic purpose of a debt management policy is to assist the government in the execution of its overall strategy by contributing to the continued financial health and stability of the organization and assuring future access to debt markets to meet both scheduled and unscheduled needs. In practice, the limits within which a debt management policy can be developed and implemented are usually very confined. Despite these limitations, it is the responsibility of each local government to develop a policy which, at a minimum, provides a conceptual framework for the issuance and management of debt.

The legal, economic, financial and market conditions associated with the issuance of debt are dynamic, unpredictable and usually in a constant mode of change. Consequently, the decision to issue debt is best made on a case-by-case basis and only after careful and timely analysis and evaluation of all relevant factors. Some of the factors that should be considered include, but are not limited to, the following:

- Legal constraints on debt capacity and various financing alternatives.
- The urgency of the capital requirements to be met and the economic costs of delays.
- Willingness and financial ability of the taxpayers to pay for the capital improvements.
- Determination as to whether to employ a "pay as you acquire" versus a "pay as you use" approach.
- Proper balance between internal and external financing.
- Current interest rates and other market considerations.
- The financial condition of the County.
- The types, availability and stability of revenues to be pledged for repayment of the debt.
- Type of debt to be issued.
- The nature of the projects to be financed (i.e., approved schedule of improvements, non-recurring improvements, etc.)

Debt Management Policies

1. Capital improvements related to enterprise fund operations (e.g., airport, water and wastewater systems, refuse disposal systems, etc.) if financed by debt, it should be repaid solely from user fees and charges generated from the respective enterprise fund operation.
2. Capital improvements not related to enterprise fund operations (e.g., parks, public buildings, etc.) may be financed by debt to be repaid from available revenue sources (including ad valorem taxes) pledgeable for same.
3. Cash surpluses, to the extent available and appropriable, should be used to finance scheduled capital improvements.

Debt Management Policies (continued)

4. The County will issue debt only for the purposes of constructing or acquiring capital improvements (the approved schedule of capital improvements) and for making major renovations to existing capital improvements.
5. All capital improvements financed through the issuance of debt will be financed for a period not to exceed the useful life of the improvements, but in no event to exceed 30 years.
6. The County shall not construct or acquire a public facility if it is unable to adequately provide for the subsequent annual operation and maintenance costs of the facility.
7. The County will at all times manage its debt and sustain its financial position in order to seek and maintain the highest credit rating possible.
8. The County should consider coordinating with other local government entities to the fullest extent possible, so as to minimize the overlapping debt burden to citizens.
9. The County will ensure that an adequate system of internal control exists so as to provide reasonable assurance as to compliance with appropriate laws, rules, regulations, and covenants associated with outstanding debt.
10. Revenue sources will only be pledged for debt when legally available and, in those situations where they have previously been used for operation and maintenance expenses/general operating expenditures, they will only be pledged for debt when other sufficient revenue sources are available to replace same to meet operation and maintenance expenses/general operating expenditures.
11. The County will market its debt through the use of competitive bid whenever deemed feasible, cost effective and advantageous to do so. However, it is recognized that, in some situations, certain complexities and intricacies of a particular debt issue are such that it may be advantageous to market the debt via negotiated sale.
12. The County will continually monitor its outstanding debt in relation to existing conditions in the debt market and will refund any outstanding debt when sufficient cost savings can be realized.
13. Credit enhancements (insurance, letters of credit, etc.) will be used only in those instances where the anticipated present value savings in terms of reduced interest expense exceeds the cost of the credit enhancement.
14. In order to maintain a stable debt service burden, the County will attempt to issue debt that carries a fixed interest rate. However, it is recognized that certain circumstances may warrant the issuance of variable rate debt. In those instances, the County should attempt to stabilize debt service payments through the use of an appropriate stabilization arrangement.

GLOSSARY OF TERMS

Advance Refunding. Bonds are issued to refund an outstanding bond issue prior to the date on which the outstanding bonds become due or callable. Proceeds of the advance refunding bonds are deposited in escrow with a fiduciary institution, invested in U. S. Treasury Bonds or other authorized securities, and used to redeem the underlying bonds at maturity or call date and to pay interest on the bonds being refunded or the advance refunding bonds. Governmental bonds are generally limited to one advance refunding.

Annual Debt Service. The combined amount due in a fiscal year for payments of interest and current maturities of principal on outstanding debt.

Arbitrage. The difference between the tax-exempt interest rate paid by the borrower and the interest rate at which the proceeds of the issue are invested. The Internal Revenue Code contains specific regulations concerning the amount that can be earned from the investment of tax-exempt proceeds. Interest earnings that exceed the allowable amount must be paid to the federal government.

Basis Point. An expression of interest equal to one-hundredth of a percent (.01%). One hundred basis points equal one percent. Used in the pricing of bonds and in discussions of the yield of a bond.

Bond. A written promise to pay a specified sum of money, called the face value (par value) or principal amount, at a specified date or dates in the future, called the maturity date(s), together with periodic interest at a specified rate. The difference between a note and a bond is that the bond runs for a longer period of time and requires greater legal formality.

Bond Counsel. The legal firm hired to advise the Issuer regarding the legal and tax aspects of the sale. Bond counsel writes the legal opinion for the bond issue. The legal opinion must be unconditional and is essential for a bond issue to be marketable. The bond opinion provides assurance to the bond purchaser that the bond was legally issued and is tax-exempt. Generally responsible for producing the legal documents required for the sale.

Bonded Debt. The portion of an issuer's total indebtedness represented by outstanding bonds of various types.

Bond Insurance. A form of credit enhancement that is provided by private, for-profit insurance companies. For a premium, insurance companies will agree to guarantee interest and principal payments to bondholders if the issuer cannot make payments. Bonds with insurance carry the credit rating of the insurer instead of the issuer, most typically AAA.

Bond Proceeds. The money paid to the issuer by the purchaser or underwriter of a new issue of municipal securities. These moneys are used to finance the project or purpose for which the securities were issued and to pay certain costs of issuance as may be provided in the bond contract.

Bond Rating. An independent assessment of the relative credit risk associated with purchasing and holding a particular bond, and the likelihood that the obligation will be repaid on-time and in full.

Call or Call Provision. The conditions under which a debt obligation may be redeemed prior to its stated maturity. Such provisions specify the date on which an obligation may be redeemed and the price investors will receive if their bonds are redeemed.

Call Premium. The amount the issuer has promised to pay in excess of par value when bonds are redeemed in advance of their maturity date. The call premium is expressed as a percent of the par value.

Commercial Paper. Short term, unsecured promissory notes issued by organizations of recognized credit quality.

Conduit Bonds. Bonds issued on be-half of entities established to provide financial assistance to private-sector entities to acquire or construct equipment and facilities deemed to be in the public interest. (This debt does not constitute debt of the County of Volusia. Bonds or other debt obligations are payable solely from the revenues or other resources pledged under the terms of the debt agreements.)

Cost of Issuance. The expense associated with the sale of a new issue of municipal securities, including such items as underwriter's spread, printing, legal fees and rating costs.

Coverage. The ratio of pledged revenues available annually to pay the debt service requirement. This ratio is one indication of the availability of revenues for payment of debt service. The formula for determining coverage, often referred to as "debt service coverage" or the "coverage ratio," is as follows:

$$\text{Coverage} = \frac{\text{Pledged Revenues}}{\text{Debt Service Requirement}}$$

Coverage Covenant. A pledge by the issuer, in the trust indenture of bond resolution, to maintain a specified level of coverage of debt service requirements from pledged revenues.

Credit Enhancement. A guarantee by a third party in a debt financing that strengthens the credit quality behind the obligation.

Credit Rating Agency. Agencies hired to appraise, analyze and monitor the credit quality of the bond issuer. These firms provide credit ratings for use by retail and institutional investors to gauge the credit risks inherent in the bond issue. The fee for the rating service is paid by the issuer and based on the issue size, type and complexity.

Current Refunding. A refunding in which the prior, refunded bonds are called or mature within 90 days of issuance of the refunding bonds.

CUSIP Numbers (Committee on Uniform Security Identification Procedures). Identification numbers assigned each maturity of a bond issue, and usually printed on the face of each individual bond in the issue. The CUSIP numbers are intended to facilitate identification and clearance of municipal securities.

Dated Date. The date on which a debt obligation begins to accrue interest. For example, if a bond issue was dated July 1 and was delivered to the purchaser (closed) on July 14, the purchaser would need to pay the issuer accrued interest from the dated date (July 1) up to but not including the delivery date (July 14).

Debt Service. The amounts of money necessary to pay interest and principal requirements for a given year or series of years.

Defease. To discharge the lien of an ordinance, resolution, or indenture relating to a bond issue and, in the process, render inoperative restrictions under which the issuer has been obligated to comply. Ordinarily, an issuer may defease an indenture requirement by depositing with a trustee an amount sufficient to fully pay all amounts under a bond contract as they become due.

Delivery Date. The date on which securities are delivered in exchange for proceeds. The delivery date is considered the date of issuance for new securities and is also known as the closing date.

Direct Debt. Any non-self-supporting general governmental debt.

Discount. The amount by which par value exceeds the price paid for a security and which generally represents the difference between the nominal interest rate and the actual or effective return to the investor.

Effective Interest Rate. The actual rate earned by the investor on bonds purchased, after allowing for premiums, discounts or accrued interest over the period of the investment.

Escrow Account. A fund established to hold moneys pledged and to be used to pay debt service on an outstanding issue.

Financial Condition. The probability that a government will meet both its financial obligations to creditors, consumers, employees, taxpayers, suppliers, constituents, and others as they become due; and service obligations to constituents, both currently and in the future. (Source: Governmental Accounting Standards Board - GASB)

Forward Refunding. A process whereby an issuer may take advantage of low interest rates by locking in at the lower interest rates and refund the bonds on their first call date. Therefore, all the terms of the transaction are agreed upon today, but the transaction does not occur until the first day of the current refunding period.

Full Faith and Credit. An unconditional pledge of a government's taxing power that secures general obligation bonds. Bonds carrying such pledges are usually referred to as general obligation bonds or full faith and credit bonds.

General Obligation (“G.O.”) Bonds. Bonds for which the payment is backed by the full faith and credit of the issuing entity. The full faith and credit is a pledge of the general taxing powers for the payment of the debt obligation. Some GO bonds, known as limited-tax GO bonds, are backed by the pledge of a defined portion of the issuer’s general taxing power.

Good Faith Deposit. A sum of money, usually in an amount from 1 percent to 5 percent of the par value of the bond issue, and generally in the form of a certified or cashier’s check, which is enclosed with the bid in a competitive sale. The check is returned to the bidder if the bid is not accepted, but the check of the successful bidder is retained by the issuer and applied against the purchase price when the bonds are delivered.

Interest. Compensation paid or to be paid for the use of money. It is generally expressed as an annual percentage rate.

Interest Rate. The annual percentage of principal payable for the use of borrowed money.

Issuer. A state, political subdivision, agency or authority that borrows money through the sale of bonds or notes.

Lease-Purchase Agreement. An agreement entered into by two parties in which one provides a facility or equipment in exchange for a pledge from the other to make regular lease payments. Upon completion of the lease term, the lessee assumes ownership of the item. Most lease-purchase agreements provide that the lessee will continue to make lease payments only as long as its governing body appropriates funds for that purpose.

Legal Opinion. An opinion concerning the legality of a municipal bond issue. Such opinions usually address the legal authority of the issuer to sell bonds, the issuer’s compliance with all procedural requirements prior to issuance, and the tax status of the bonds as an investment.

Limited Tax Bond. A general obligation bond secured by the pledge of a specified tax or category of taxes which is limited as to rate or amount.

Long-term Debt. Debt with a maturity of more than one year after date of issuance.

Maturity. The date when the principal amount of a security is payable.

Maximum Annual Debt Service. The largest combined amount of the annual debt service becoming due in any fiscal year in which bonds are outstanding, excluding all fiscal years which have ended prior to the fiscal year in which the maximum annual debt service is computed.

Municipal Bond. A debt obligation issued by a state or local government, to provide funds for a government’s general financing needs or for special projects. Municipal bonds are free from federal tax on the accrued interest and also free from state and local taxes if issued in the state of residence.

Municipal Securities Rule Making Board (MSRB). An independent, self-regulatory organization established by Congress in 1975 having general rule making authority over municipal securities market participants.

Negotiated Sale. The sale of a new issue of municipal securities by an issuer through an exclusive agreement with an underwriter or underwriting syndicate selected by the issuer. The primary points of negotiation for an issuer are the interest rate and purchase price on the issue.

Official Statement. A disclosure document prepared in connection with a specific offering which provides detailed information concerning security provisions, maturity dates and amounts, optional redemption provisions, ratings, coupon rates and reoffering yields, and other relevant credit data. The official statement is prepared and circulated after the sale has been completed. (See “Preliminary Official Statement”).

Par Value. The face or amount of the principal of a bond or note.

Per Capita. In Latin translation, per head – per person.

Preliminary Official Statement. A disclosure document prepared in connection with a specific offering that provides detailed information concerning security provisions, maturity dates and amounts, optional redemption provision, and other relevant credit data. The preliminary official statement is prepared and circulated as a marketing tool prior to the sale of the securities. (See “Official Statement”).

Premium. The amount by which the price of a bond exceeds its Principal amount or Par value. A redemption premium is the premium an issuer is required (by the terms of a bond) to pay to redeem (call) the bond prior to its stated maturity.

Present Value. The value today of a future payment, or stream of payments, discounted at some appropriate compound interest (or discount) rate. Also called the time value of money.

Principal. The face amount of a debt instrument on which interest is either owed or earned.

Ratings Agencies. The organizations that provide publicly available ratings of the credit quality of securities issuers. The term is most often used to refer to the three nationally recognized agencies, Moody's Investors Service, Inc., Standard and Poor's Corporation, and Fitch Ratings.

Ratings. Designations of the quality of bonds or notes issued by state and local governmental units. Ratings are provided by agencies or corporations that seek to render a professional judgment concerning the quality of the security being rated.

Refunding. A process whereby an issuer refinances an outstanding bond issue by issuing new bonds. The refunding bonds may be sold for cash and outstanding bonds redeemed in cash, or the refunding bonds may be exchanged with holders of outstanding bonds.

Reserve. An account used to indicate that a portion of fund equity is legally restricted for a specific purpose or not available for appropriation and subsequent spending.

Revenue Bond. A bond which is payable from a specific source of revenue and to which the full faith and credit of an issuer with taxing power is not pledged. Revenue bonds are payable from identified sources of revenue, and do not permit the bondholders to compel taxation or legislative appropriation of funds not pledged for payment of debt service. Generally, no voter approval is required prior to issuance of such obligations.

Revolving Loan Fund. A centrally administered (usually by a state) fund that makes loans to subordinate units of government to address specific funding objectives. Loan repayments are recycled into additional loans. Original capitalization often comes from a combination of federal grants and state monies.

Securities. Bonds, notes mortgages, or other forms of negotiable or non-negotiable instruments.

Sinking Funds. An account into which an issuer makes periodic deposits to assure timely availability of monies for the payment of debt service requirements. The sinking fund was the fund created to accumulate moneys to "sink" the debt at its maturity.

SLGS. An acronym for "State and Local Government Series." SLGS are special United States Government securities sold by the Treasury to states, municipalities and other local government bodies through individual subscription agreements. The interest rates and maturities of SLGS are arranged to comply with arbitrage restrictions imposed under Section 103 of the Internal Revenue Code. SLGS are most commonly used for deposit in escrow in connection with the issuance of refunding bonds.

Special Assessment Bond. A municipal general obligation bond whose debt service is paid by a special tax or assessment on property in a particular locality because that property receives a special benefit due to some public improvement, separate and apart from the general benefit accruing to the public at large.

Subordinated Debt Instrument. A debt instrument requiring that repayment of principal may not be made until another debt instrument senior to it has been repaid in full.

Surety. A type of insurance specifically covering the debt service reserve fund.

Underlying Rating. An assessment of a bond's credit, without considering external credit enhancements. For an insured bond issue, the underlying rating is the rating the issue would receive if it had no insurance.

Yield. The rate earned on an investment based on the price paid for the investment, the interest earned during the period held and the selling price or redemption value of the investment.
