FY 22/23 Q4 Update  

Revised 050123
Project:

Fire Station 15 – Red John Rd. and International Speedway Blvd.

Scope:

This project will provide a new fire station to house Fire Station 15 personnel, who are currently located at the Fire Rescue Training Center. The fire station will be moved to Red John Rd and International Speedway Blvd, which will allow faster access to Interstates I-4 and I-95 than where the station is currently located. This will also allow for adequate living quarters and station space, which they are currently lacking at the Training Center.

Acquisition:

Existing County Property

Design:

Start: 1st Qtr. – FY 23/24
Finish: 1st Qtr. – FY 24/25

**Project:**
Countywide - 800 MHz Radio System Backbone and Radios

**Scope:**
Planning, design, and implementation of modern P25 Phase II 800 MHz public safety radio system. The existing 800 MHz radio system, which includes the microwave system, was implemented in 1993. The equipment and technology has reached end-of-life and will be upgraded/replaced as part of this project. The system supports over 9,000 radios used countywide by county and city agencies. In Phase I, a radio system consultant will assist the county in assessing existing assets, evaluating microwave and radio system technology, performing high level needs assessments, and providing financial and technical options analysis. In Phase II, the consultant will assist with radio system design and specifications, procurement, and implementation.

**Acquisition:**
800 MHz Public Safety Radio System was implemented in 1993

Project:
Beresford Ave. Extension – Kepler Rd. / Dr. Martin Luther King Jr. Pkwy. to SR 44 in DeLand

Scope:
New 2-lane road construction that includes the re-alignment of Summit Ave adjacent to the Daytona State College campus. Right of way has been donated by the Lakewood Park subdivision developer to offset their proportionate fair share (PFS) requirements consistent with the PFS Agreement. The remaining right of way will come from the Volusia County School Board in trade for property from the Lakewood Park developer and the City of DeLand. The Lakewood Park developer will construct the western portion of the Beresford Ave. extension as part of their development. Once the Developer’s portion of Beresford Ave. is constructed, the County’s portion will be constructed.

**Project:**
Pooser Pond Stormwater Improvements

**Scope:**
The project consists of the mitigation of flooding conditions sustained during rain events as well as the removal of nutrient loading into the Blue Spring priority focus area. Pooser Pond, located on E. Elm Drive in Orange City, receives stormwater runoff from nearby roadways and has no natural outfall. This project entails constructing a pump station and force main to pump the water out of Pooser Pond to a nutrient reducing treatment system that will be constructed at the site of the decommissioned Four Towns Wastewater Plant.

**Project:**  
North Beach Street Resiliency

**Scope:**  
The project is located in Ormond Beach within the Tomoka River Basin. North Beach Street is subject to flooding conditions during intense rainstorms and high tidal occurrences. During these events the road frequently becomes impassable, which requires road closure notifications and detours established. This project consists of raising the elevation of a portion of the roadway and installing storm drain pipes that will alleviate flooding conditions and allow the road to be used as an alternate evacuation route during impending weather events.

Project:
Buckingham Drive Exfiltration System

Scope:
The project is located in Ormond Beach within the North Peninsula study area of the Halifax River Stormwater Outfall Assessment (2015 Study). It is an identified stormwater best management practice (BMP) that once implemented would work towards meeting the total maximum daily load (TMDL) goals for reducing nutrients to the Halifax River. The project entails replacing the existing reinforced concrete pipe along Buckingham Drive with an exfiltration trench, installing a weir structure at the downstream end of the proposed exfiltration, and retrofitting the outfall at the Halifax River with the installation of a nutrient separating baffle box.

Status:
Implementation of Video Visitation and Inmate Phone System was completed in August 2019. The Jail Management System training completed in January 2021. The Jail Management System training completed in December 2020. The system went into production on March 27, 2021 and experienced some issues integrating into existing county court processes due to documentation from the prior system. This resulted in some downtime for data flow between Corrections and outside agencies. The issue has been resolved, and we are now focusing on additional features and reporting. Final system acceptance Q3.
