GENERAL OVERVIEW

Executive Summary

On March 11, 2021, President Biden signed the American Rescue Plan Act of 2021 (ARPA) into law. The ARPA contained an allocation of \$362 billion in state and local fiscal recovery funds to assist state and local government with recovery efforts. Volusia County has been allocated \$107.4 million in recovery funds. The county received its first payment of \$53.7 million in May 2021. In June 2022 the county received its second and final installment in the amount of \$53.7 million. The deadline to obligate funds as required by the act is December 31, 2024 and funds must be fully expended by December 31, 2026.

These funds, as they were originally enacted are eligible be used (a) to respond to the COVID-19 public health emergency or its negative economic impact (b) provide premium pay to workers performing essential work during the COVID-19 public health emergency, (c) revenue replacement for the provisions for governmental services to the extent of the reduction in revenue of the county due to the COVID-19 public health emergency, or (d) to make necessary investments in water, sewer, or broadband infrastructure. On December 29, 2022, the Consolidated Appropriations Act, 2023 was enacted, amending the uses of the program to provide additional flexibility for recipients to use SLFRF funds to respond to natural disasters, build critical infrastructure, and support community development. However, the County Council had already allocated most of these funds prior to the enactment of the expanded uses.

On February 15, 2022, the Council passed Resolution No. 2022-22 which approved Volusia County's slate of projects to utilize this CLFRF. Volusia County's Recovery plan focuses on addressing the needs of residents and families hardest hit by the COVID-19 public health emergency and necessary infrastructure investments to support the citizens of Volusia County. The County Council has approved amendments to the budgetary plan for the CLFRF funds in both August 2022 and December 2022. In June 2024, the Council further amended the plan, which included the incorporation of several staff-level budget adjustments, the majority of which were to deobligate funding for completed projects.

A summary of the current, amended plan as allocated into expenditures categories (EC) in accordance with United States Department of Treasury reporting requirements is as follows:

EC#	EC Name	Amount Budgeted	Amount Expended
		as of June 30, 2024	as of June 30, 2024
EC 1	Public Health	\$ 8,242,463	\$ 7,118,106
EC 2	Negative Economic Impacts	2,254,416	809,527
EC 3	Public Health-Negative Economic	1,355,376	1,355,376
	Impact: Public Sector Capacity		
EC 4	Premium Pay	2,906,966	2,902,966
EC 5	Infrastructure	51,587,629	5,220,716
EC 6	Revenue Replacement	38,880,220	35,000,000
EC 7	Administrative	413,345	233,443
N/A	Reserved Funding	1,832,516	-
	Total	\$ 107,468,931	\$ 52,640,134

Uses of Funds

Based upon the adopted spending plan and directions from County Council, County staff is continuing to implement the process to identify agencies and contractors to meet the goals of the plan. The outline below provides the broad categories of the allocation of the \$107.4 Million of Coronavirus State and Local Fiscal Recovery Funds provided under ARPA.

- 1) Public Health (EC 1) Volusia County Council approved, as amended, \$8,242,463 in projects categorized under EC 1 (Public Health) as follows:
 - a) Mental Health/Substance Abuse \$1,856,128

Volusia County's alcohol, drug and mental health service providers have seen a continued high rate of demand for drug, alcohol and mental health services during and subsequent to the pandemic. This allocation seeks to provide additional funding to address additional community demands for mental health services. In addition, there was \$29,627 expended for a needs assessment/gap analysis for mental health and substance abuse services in the County.

b) Family Resource Center Mental Health Services - \$628,457

As the demand for services increases the Sheriff Department proposed and implemented a Family Resource Center that will centralize family service planning, promote cross-agency communication, and provide services onsite

c) County COVID-19 Expenses - \$412,429

The original allocation of \$2,500,000 was to provide resources for testing, advertising, personal protective equipment, building cleaning and sanitization, etc. After responding to the initial reactive period, the county has now budgeted for and considers the ongoing costs associated with these items a routine operating expense. The savings in this category have been shifted to reserved funding (available for another project/program).

d) COVID-19 Medical and Worker Compensation Claims - \$5,345,449

The county received substantial claims related to COVID-19. This helps to reimburse a portion of those claims caused by COVID-19.

- 2) Negative Economic Impacts (EC 2) Volusia County Council approved, as amended, \$2,254,416 in projects which focus on the negative economic impacts to households hardest hit by the COVID-19 pandemic, as follows:
 - a) Housing Repair Program \$1,810,903

To help address a waiting list that other federal grant funding programs have been insufficient to meet for repair assistance for qualifying properties.

b) Library Social Worker program - \$443,513

A social worker in the libraries are now available during scheduled hours to provide one-on-one counseling/metal health, food/SNAP benefits, health, housing, unemployment assistance and other governmental service assistance.

3) Public Health – Negative Economic Impacts: Public Sector Capacity (EC 3)

County Council approved supplemental leave time for County employees for COVID-19 caused absences, like that previously required federally under the Families First Coronavirus Response Act. The original budget for the program was \$750,000, however, due to subsequent extensions and additions of available leave time provided by County Council, the revised budget for this project is \$1,353,509. Funding for the increased amount was taken from the originally budgeted reserve funding for the CLFRF. In addition, \$1,867 was allocated for a pilot program during the height of the pandemic for an offload nurse at Halifax Hospital.

4) Premium Pay (EC 4)

County Council approved premium pay for its employees and those of the County's Constitutional Officers in accordance with the guidance set forth in the United States Department of Treasury Final Rule. The employee pay-outs associated with the premium pay authorized by Council totalled \$2,902,966.

- 5) Water, Sewer, and Broadband Infrastructure (EC 5) The County has designated water and sewer infrastructure as a critical need, allocating, as amended, \$51,587,629 to projects in this category. Proposed projects will convert and increase advanced wastewater treatment processing capabilities at two of the County's existing sewage processing plants and treat stormwater runoff to mitigate flooding and reduce nutrient loading.
 - a) Sewer capacity increases and advanced wastewater treatment capabilities \$25,000,000

Two large projects that will increase the capacity at the Southwest wastewater treatment plant and Southeast treatment plant as well as providing advanced wastewater treatment at the Southeast facility. These projects will have a direct and positive environmental impact on water quality concerns at Blue and Gemini Springs and the Mosquito Lagoon estuary. Both of these projects will also have partnership funding from the Florida Department of Environmental Protection (State Funded Grants).

b) Stormwater improvements- \$23,524,366

Stormwater improvements consist of 6 projects aimed at reducing flooding and nutrient reducing treatment. These projects benefit inland springs and rivers to near shore river and basins.

c) Broadband Enhancements - \$2,671,690

To enhance broadband internet service to the underserved areas within Volusia County, in accordance with the requirements of the United States Department of Treasury Final Rule on the CLFRF.

d) Ormond Beach Water Line Interconnect - \$391,573

Resiliency project to ensure reliable and safe supply in the event of an emergency for county utilities customers in the northeast section of the county.

6) Revenue Replacement (EC 6)

The COVID-19 pandemic has resulted in a significant reduction in the County's general revenue growth as compared to what has been experienced in the past, as evidenced by the Treasury model for calculating for revenue loss. This reduction in revenue growth has negatively impacted the County's ability to fund future operational and capital needs that would normally have been funded through revenue appreciation. The County plans to use fiscal recovery funds to reimburse itself for public safety wages and benefits up the extent of revenue loss, as allowed by United States Department of Treasury regulations. Using these funds for reimbursement of public safety wages and benefits will result in budgetary savings in the funds that originally paid for such wages and benefits.

While not a requirement of the American Rescue Plan, the County will further plan the expenditure of the above-mentioned budgetary savings for public transparency utilizing a separate "APRA Transition Fund". These budgetary savings will be used to provide additional capital needs and services for our residents.

This use category was originally budgeted and utilized fully at \$35,000,000. In June 2024, the County Council approved an increased use of this provision to a total budget of \$38,880,220, based on revised estimates of revenue loss in accordance with the Treasury model for calculation of revenue loss. As of June 30, 2024, the additional \$3,880,220 of allocated budget has not been utilized.

7) Administrative (EC 7)

Administration expenses are budgeted at \$413,345. This amount represents an administrative expense rate of 0.38%, which is significantly under the typical grant administration rates of 5-10%.

Promoting Equitable Outcomes

Volusia County has created a plan to provide equitable outcomes to meet as many needs throughout the community as possible.

1) Goals

- a) Public Health and Safety
 - i) Provide additional mental health services to the populations hardest hit by the pandemic.
 - ii) Provide additional juvenile mental health and evaluation services to the at-risk juvenile population of Volusia County.
 - iii) Provide for increase safety of employees and citizens of the county by providing PPE supplies and cleaning and sanitation of county facilities.
- b) Respond to the Negative Economic Impacts
 - i) Expand the housing repair program to satisfy a waiting list of applicants who qualify for homeowner assistance.
 - ii) Reach and assist individuals who need governmental provided services and assistance.
- c) Infrastructure Water, Sewer, and Broadband
 - i) Expanding Broadband in the county and targeting rural areas and underserved neighborhoods that have no or unreliable access to internet.
 - ii) Provide for stormwater improvement to prevent neighborhood flooding and water quality issues.
 - iii) Increase sewer capacity.
- d) Revenue Recovery
 - i) Reinvesting of the revenue replacement funding on public safety wages, allowed previously encumbered General Fund budget to be freed up for the reestablishment of programs that had been delayed or defunded because of the pandemic.

2) Awareness

- a) The county will use its community information division to promote its program of funded services.
- b) County Council Meetings
- c) Working with community organizations to communicate programs.

3) Access and Distribution

- a) One of the approved social service programs will based out of the county's library system. Libraries are distributed throughout the count and can be accessed by public transportation.
- b) The social service program will be awarded based upon a Notice of Funding availability. The notice of funding will be broadcast publicly by the counties community services division and proposal will be awarded by the council.
- c) The county will be using established community organizations and providers to run many of its social services programs to better target those in need.

4) Outcomes

- a) Health and public safety through awareness through testing and vaccinations
- b) Infrastructure investments in sewerage and water quality issue vital to all citizens of Volusia County.
- c) Affordable housing repair programs to address communities' sectors hardest hit.

Community Engagement

The Volusia County Council made its final approval of the projects that will be funded with Fiscal Recovery Funds on February 15, 2022. However, as with any budgetary decision made by the County Council, the budget is subject to amendment. Throughout the decision-making process, the Council has promoted and continues to promote open feedback and dialog with its constituents.

- On July 27, 2021, the Council held a public workshop solely dedicated to reviewing the proposed and available use of ARPA funding.
- ARPA projects also were publicly discussed at a regularly scheduled Council meeting on August 3, 2021.
- On August 31, 2021, the Council held a special meeting to discuss and begin finalize its
 proposed uses of ARPA funding, with the meeting being promoted to the public and local news
 media through the issuance of a news release for the widest possible dissemination. This
 meeting will set the foundation for the ARPA funded projects and future reporting requirements.
- On February 1, 2022, the Council held a special workshop to discuss proposed project list and receive public input along with provider groups proposals and recommendations. At this workshop the council was able to come to an agreement on project funding.

- On February 15, 2022, at a regular public meeting the council approved the final projects list and spending plan recommendations set forth at the February 1, workshop.
- Subsequent regular public meetings of the County Council have amended the projects list, including the most recent amendment at the June 18, 2024 meeting. This staff-proposed amendment was approved by the County Council to ensure compliance with the Treasury's project encumbrance and close out requirements.

The county will use a variety of community engagement methods to reach the diverse population of residents of the community through community meetings, social media and the county's website.

Labor Practices

Volusia County has funded three major infrastructure projects with CLFRF funds that are of significant individual project cost — \$18.4 million to the Southwest Regional Water Reclamation Facility, \$6.6 million to the Southeast Regional Wastewater Treatment Plant expansion and \$15 million to a stormwater runoff system for the landfill new waste cell. For these three major infrastructure projects, Volusia County is taking initiatives to fulfill the requirements of the U.S. Treasury to promote strong labor practices.

For these projects, Volusia County will require the contractor and its subcontractors on this project comply with the Davis-Bacon Act, requiring all laborers and tradesmen employed in the performance of the project to be paid wages not less than those prevailing, as determined by the U.S. Secretary of Labor.

Use of Evidence

Volusia County will ensure SLFRF funds are used for well established, defined, evidence-based interventions/programs that have a documented history of effectively addressing issues they aim to solve. In many cases the projects and programs funded through SLFRF funds directly impact and address the issue it aims to solve and these projects provide immediate results showing their impact and effectiveness.

Performance Measures

Volusia County has developed key performance indicators separately for each of the CLFRF-funded projects. Each performance measure is identified in the project inventory, and not duplicated in this section.

Output performance measures are those that provide valuable information about the status of the project. Outcome performance measures are those that provide information about whether the project is achieving its overall goals.
